**REPORT.**

THE Registrar-General, acting in co-operation with the Registrars-General of England and Wales and of Ireland, has decided that the classification of the causes of death to be used in the preparation of his reports shall, from the commencement of this year, be the International Classification, and that the classification which has been in use since 1901 shall be abandoned. Accordingly, the abstracts given on pages 4 to 13 of this report are drawn up in conformity with the International Classification, and the figures there given are not in all cases strictly comparable with those of the corresponding abstracts given in previous monthly reports. On pages i-iv there will be found a note of the principal changes involved. A more extended note on the subject will in course be published in the Detailed Annual Report.

During the month of January 1911 there were registered in the towns of Glasgow, Edinburgh, Dundee, Aberdeen, Paisley, Leith, Greenock, and Perth, the births of 3758 living children, of whom 1902 were male and 1856 female. These births are 91 more than those registered in December, and 24 more than those registered in January of last year. The equivalent annual birth-rate is 23·1 per thousand of the estimated aggregate population of the eight towns, a rate which is 0·3 above that of December, but is 0·2 below that of January of last year, and is the lowest January birth-rate recorded in these reports. The birth-rate of the month varied from 31·9 in Greenock to 17·8 in Perth, and 18·5 in Edinburgh. In Dundee it was 27·4, in Leith 25·6, in Glasgow 23·9, in Paisley 23·1, and in Aberdeen 20·7.

Of the 3758 children whose births were registered during the month, 304, or 8·1 per cent., were illegitimate. These births are 17 more than in December, and 32 more than in January of last year. The illegitimate rate is 0·3 more than that of December, and 0·8 more than that of January of last year.

Marriages registered in the eight towns during the month numbered 1595; they are 274 more than were registered during December, and 94 more than in January of last year. The equivalent annual marriage-rate is 9·8, which is 1·6 above that of December, and 0·5 above that of January of last year.

Deaths registered in the eight towns during January numbered 2520; they are 32 more than in December, but 325 fewer than in January of last year. The

equivalent annual death-rate is 15·5 per thousand, which rate is the same as that of December, but is 2·2 less than that of January of last year, and is the lowest January death-rate recorded in these reports. This is the first January death-rate which has been below 17, and the third to be below 19. The death-rate of the month varied from 18·6 in Dundee to 13·6 in Paisley. In Leith it was 17·6, in Greenock 16·8, in Glasgow 15·4, in Edinburgh 14·8, in Perth 14·4, and in Aberdeen 13·7. The death-rates of Aberdeen, Leith, and Greenock are higher than in December, but that of Glasgow is of the same amount, and those of Edinburgh, Dundee, Paisley, and Perth are lower.

Of the 2520 deaths, 766 or 30·4 per cent., were of children of less than five years old, and 603, or 23·9 per cent., were of persons of more than sixty-five. The former are 22 more than in December, but 240 fewer than in January of last year.

Deaths from the principal epidemic diseases (Col. 6 to 13 of Table III.) numbered 226, and the equivalent annual death-rate is 1·4 per thousand. This rate ranged from 3·5 in Leith, where whooping-cough was prevalent, to 0·7 in Aberdeen, and 0·9 in Edinburgh. In Dundee it was 2·1, in Perth 1·9, in Paisley 1·6, in Glasgow 1·4, and in Greenock 1·0.

There were no deaths from small-pox registered in the eight towns during the month. Deaths from measles numbered 7; from scarlet fever 21; from whooping-cough 78, of which 36 were in Glasgow and 17 in Leith; from diphtheria 42; from enteric fever 12; from typhus fever 1; and from diarrhoeas 66, of which 47 were of children of less than two years old. Deaths from cerebro-spinal meningitis numbered 7; they were all registered in Glasgow.

Deaths from influenza numbered 5; from puerperal septic conditions 11; and from malignant disease 176, of which 96 were ascribed to carcinoma, 7 to sarcoma, and 73 to other or unspecified form of cancer. Deaths from heart disease (Classification numbers 77 to 80), excluding deaths certified as due to syncope and to heart failure, numbered 212; deaths from apoplexy numbered 134; from premature birth debility 90; and from alcoholism 6.

Deaths from pneumonia numbered 289, and constituted 11·5 per cent. of the total deaths of the month; they are 17 fewer than in December, and 40 fewer than in January of last year. Deaths from bronchitis numbered 212; they are 42 fewer than in December, and 26 fewer than in January of last year.

Deaths ascribed to tuberculous disease numbered 294, and constituted 11·7 per cent. of the total deaths of the month; they are 19 more than in December, but 13 fewer than in January of last year. Of these deaths, 174 were ascribed to phthisis, these forming 6·9 per cent. of the total deaths of the month, and being 14 fewer than in December, and 30 fewer than in January of last year. The death-rate from tuberculosis amounted to 1·8 per thousand; it is 0·1 above that of December, but 0·1 below that of January of last year. This rate in Dundee was 2·4, in Greenock and in Perth 2·2, in Paisley 2·0, in Glasgow and in Edinburgh 1·8, in Aberdeen 1·2, and in Leith 1·1.

Deaths from violence numbered 99; of them 2 were attributed to suicide, the one being by strangulation, the other by gunshot.

Among those whose deaths were registered in the eight towns during the month there were 6 males and 8 females whose ages were stated to be 90 years and upwards, the oldest being a mechanical engineer and two widows, all three being aged 92.

#### BIRTHS, DEATHS, ETC., IN OTHER SELECTED REGISTRATION DISTRICTS.

On page 14 there is given the usual monthly statement regarding the births, deaths and marriages registered in forty-nine selected registration districts. These districts have an estimated aggregate population of 855,912. Births registered in them during the month numbered 1739, deaths 1150 and marriages 541. The equivalent annual birth-rate is 23·9, the death-rate 15·8, and the marriage-rate 7·4. Compared with the returns of the corresponding month of last year, the birth-rate is 0·3 less, the death-rate 2·1 less, and the marriage rate 2·0 less.

Deaths registered in these districts during the month included 10 from measles, of which 7 were in Falkirk; 9 from scarlet fever; 44 from whooping-cough; 26 from diphtheria; 8 from enteric fever; 18 from diarrhoeas; 3 from croup; 2 from laryngitis; 213 from bronchitis, pneumonia, and pleurisy; 124 from tuberculous disease; and 1 from cerebro-spinal meningitis.

# THE METEOROLOGICAL RETURNS

FOR

## EIGHT OF THE PRINCIPAL TOWNS IN SCOTLAND,

Reduced and corrected as heretofore for instrumental errors, give for their mean position, *i.e.*, Lat.  $56^{\circ}12'$  N., and Long.  $3^{\circ}30'$  W., and height 151 feet above the sea-level,

### For the month of JANUARY 1911.

Mean barometric pressure,  $30\cdot188$  inches; greater than the average of 1856–1905 by  $0\cdot363$  inch.

Mean temperature,  $39^{\circ}9$ ; greater by  $1^{\circ}9$ .

Mean daily range of temperature,  $8^{\circ}9$ ; less by  $0^{\circ}1$ .

Rain, number of days, 15; less by 2 days.

Rain, depth in inches,  $2\cdot13$ ; less by  $1\cdot31$  inch.

Wind, direction of: a 2 days' excess of winds from W.

Hence the month of January 1911 was characterised by an extremely high mean pressure; a high mean temperature, with a normal mean daily range; a low mean rainfall; and an excess of westerly winds.

The mean pressure of  $30\cdot188$ , or  $0\cdot363$  inch above the normal, was as much as six tenths of an inch above that for December, and has been exceeded in January during the last fifty years only in 1880 and 1896. There was a considerable fall of the barometer from 5th to 6th, and a rapid fall of about 1 inch from 10th to 11th, followed by almost as rapid a recovery. Except at these dates sea-level pressure at Leith was almost continuously above 30 inches, and exceeded  $30\cdot5$  inches from 17th to 19th, and on 30th and 31st. The sea-level extremes there were  $30\cdot693$  inches on the evening of 31st and  $29\cdot284$  inches on the morning of 6th.

The mean temperature of  $39^{\circ}9$  was  $1^{\circ}9$  above the normal, the temperature excess being equally well marked by day and by night. During the first two weeks conditions differed little from the normal, though there was a touch of cold about 4th; but during the third week and still more so during the fourth, extremely mild weather was experienced. Temperature fell rapidly on the last day of the month. As compared with former years, January 1906 was at least as mild, and January 1898 very much milder. The extreme readings were  $53^{\circ}$  at Glasgow, Paisley, Leith, and Perth on 25th or 26th, and  $22^{\circ}$  at Glasgow on 31st.

The mean rainfall was  $2\cdot13$  inches, or 38 per cent. below the normal. All the towns reported a deficiency, which was slight at Greenock, whilst the Edinburgh area had only half its normal amount, Dundee barely one quarter, and Perth less than one fifth. In West and North-West heavy falls occurred on 10th and 11th, Greenock reporting  $2\cdot34$  inches on 10th and Paisley more than 1 inch, and there were rather heavy falls again about 24th and 25th. But outside these dates there were many quite rainless days, whilst at Perth the 11th was the only day with more than one tenth of an inch, and at Edinburgh half of the month's small total was accounted for on that date.

Gales or high winds were experienced on 10th and 11th and again about 24th, and fog from 3rd to 5th and on 31st. Falls of snow and sleet occurred at the Eastern towns about 3rd and 11th.

DISEASES WHICH ARE DIFFERENTLY CLASSIFIED IN THE OLD AND IN  
THE NEW LIST OF CAUSES OF DEATH.

NAME OF DISEASE.	CLASSED IN OLD TABLES WITH	CLASSED IN NEW TABLES WITH
Addison's Disease.	Disease of Supra-renal Capsules.	†Addison's Disease.
Ante-partum Hæmorrhage.	Placenta Prævia, Flooding.	Other Diseases and Accidents of Pregnancy.
Arterio-sclerosis.	Other Diseases of Blood Vessels.	†Arterio-sclerosis.
Arthritis.	Arthritis, Periostitis.	Diseases of Joints.
Atelectasis.	*Atelectasis.	Other Diseases peculiar to Early Infancy.
Atrophy, Debility, etc.	*Atrophy, Debility.	Under 3 months, Congenital Debility, etc.
		3 months and over, Other Ill-defined Diseases.
Breast, Puerperal Diseases of.	Other Accidents of Pregnancy and Childbirth.	†Puerperal Diseases of Breast.
Carbuncle.	Phlegmon, Carbuncle.	Carbuncle, Boil.
Caries, Necrosis.	*Caries, Necrosis.	Diseases of Bones.
Cerebral Embolism, Thrombosis.	Cerebral Hæmorrhage, Embolism, Thrombosis.	†Cerebral Embolism, Thrombosis.
Cerebral Hæmorrhage.	Cerebral Hæmorrhage, Embolism, Thrombosis.	Cerebral Hæmorrhage, Apoplexy.
Cholera Nostras.	Diarrhœa.	†Cholera Nostras.
Colic.	Intestinal Obstruction.	Diarrhœa, Enteritis.
Cretinism.	Disease of Thyroid Body.	Other Dis. of Nervous System.
Dilatation of Heart.	*Dilatation of Heart.	Other Organic Diseases of Heart.
Dyspepsia (Infantile).	Want of Breast Milk.	Diarrhœa, Enteritis.
Ectopic Gestation.	Other Accidents of Pregnancy and Childbirth.	†Ectopic Gestation.
Eczema.	*Eczema.	Other Diseases of Skin, etc.
Embolism, Pulmonary.	Embolism, Thrombosis.	†Pulmonary Apoplexy.
Emphysema.	Emphysema, Asthma.	†Pulmonary Emphysema.
Empyema.	Other Infective Conditions.	Pleurisy.
Encephalitis.	Other Diseases of Nervous System.	†Encephalitis.
Endocarditis (chronic or unqualified over 60 years).	Valvular Disease, Endocarditis.	Other Organic Diseases of Heart.
Endocarditis, Infective.	*Infective Endocarditis.	Acute Endocarditis.
Enteritis.	*Enteritis.	Diarrhœa, Enteritis.
Enteritis, Infective.	Epidemic Diarrhœa, Infective Enteritis.	Diarrhœa, Enteritis.
Epidemic Pneumonia.	*Epidemic Pneumonia.	Pneumonia.
Epistaxis.	Diseases of Nose.	Hæmorrhage, etc.
Exophthalmic Goitre.	Disease of Thyroid Body.	†Exophthalmic Goitre.
Gallstones.	Other Diseases of Liver.	†Gallstones.
Gangrene (not senile).	Phagedæna.	Other Gangrene.
Gangrene of Lung.	Other Diseases of Respiratory System.	†Gangrene of Lung.
Gastric Catarrh.	*Gastric Catarrh.	Other Diseases of Stomach.
Gastro-enteritis.	*Gastro-enteritis.	Diarrhœa, Enteritis.
Hæmorrhoids.	Other Dis. of Digestive System.	Diseases of Veins.
Heart Failure.	Heart Disease, unspecified.	†Heart Failure.
Hemiplegia.	Apoplexy, Hemiplegia.	†Hemiplegia.
Hydatids of Liver.	Other Diseases of Liver.	†Hydatids of Liver.
Hydrocephalus (unqualified).	Other Diseases of Nervous System.	Congenital Malformations.
Hypertrophy of Heart.	*Hypertrophy of Heart.	Other Organic Diseases of Heart.

MONTHLY RETURN  
OF THE  
BIRTHS, DEATHS, AND MARRIAGES  
REGISTERED  
IN EIGHT OF THE PRINCIPAL TOWNS OF  
SCOTLAND;  
WITH THE CAUSES OF DEATH AT FOUR PERIODS OF LIFE.

---

**FEBRUARY 1911.**

---

Published by Authority of the Registrar-General

EDINBURGH: Printed for His Majesty's Stationery Office by NEILL & Co. Ltd., Bellevue, and sold  
by OLIVER & BOYD, Edinburgh.

---

**REPORT.**

DURING the month of February 1911 there were registered in eight of the principal towns of Scotland, namely, Glasgow, Edinburgh, Dundee, Aberdeen, Paisley, Leith, Greenock, and Perth, the births of 3419 living children, of whom 1762 were male, and 1657 female. These births are 339 fewer than were registered in the eight towns during January, and 109 fewer than in February of last year. The equivalent annual birth-rate is 23·3 per thousand of the estimated aggregate population, a rate which is 0·2 above that of January, but 1·0 below that of February of last year. It is the lowest February birth-rate recorded in these reports, that is since 1855. The birth-rate of the month ranged from 31·1 in Greenock, to 18·3 in Edinburgh. In Leith it was 27·3, in Dundee 25·2, in Glasgow 24·4, in Aberdeen 22·6, in Paisley 21·4, and in Perth 18·4.

Of the 3419 children whose births were registered during the month, 275, or 8·0 per cent., were illegitimate. Those children are 29 fewer than in January, but 12 more than in February of last year. The illegitimate rate of the month is 0·1 less than in January, but 0·5 more than in February of last year.

Marriages registered during the month numbered 768; they are 827 fewer than were registered in January, but 18 more than in February of last year. The equivalent annual marriage-rate is 5·2 per thousand, which is 4·6 below the rate of January, but is the same as that of February of last year.

Deaths registered in the eight towns during the month numbered 2785; they are 265 more than in January, and the same number more than in February of last year. The equivalent annual death-rate is 18·9 per thousand, which is 3·4 more than in January, and 1·5 more than in February of last year. The death-rate of the month ranged from 24·0 in Dundee, to 14·1 in Aberdeen. In Perth it was 20·4, in Glasgow 20·1, in Greenock 20·1, in Leith 17·8, in Paisley 17·4, and in Edinburgh 16·5. In all eight towns the death-rate of the month was higher than in January.

Of the 2785 deaths, 838, or 30·1 per cent., were of children of less than five years old, and 700, or 25·1 per cent., of persons of over sixty-five. The former are 72 more than in January, and 41 more than in February of last year. The latter are 97 more than in January.

Deaths of children of less than one year old numbered 505 ; they are 45 more than in January, and 68 more than in February of last year. The infantile mortality rate is 1.45 per thousand of the average number of births registered monthly in these towns during the previous twelve months, a rate which is 26 more than in January, and 23 more than in February of last year. The infantile mortality rate for the month ranged from 2.14 in Leith to 4.1 in Greenock. In Dundee it was 1.91, in Glasgow 1.52, in Paisley 1.35, in Aberdeen 1.29, in Edinburgh 1.26, and in Perth 0.66.

Deaths from the principal epidemic diseases numbered 285, the equivalent annual death-rate from those causes being 1.9 per thousand. Those deaths are 59 more than in January. This rate ranged from 4.8 in Leith, where whooping-cough was prevalent, to 0.7 in Aberdeen. In Perth this rate was 2.8, in Glasgow 2.3, in Dundee 1.9, in Paisley 1.5, in Edinburgh 1.3, and in Greenock 1.2.

There were no deaths from small-pox during the month. Deaths from measles numbered 18, of which 14 were in Edinburgh ; from scarlet fever 22 ; from whooping-cough 155, of which 96 were in Glasgow and 26 in Leith. Deaths from diphtheria numbered 34 ; from enteric fever 6 ; and from diarrhoea 50, of which 35 were of children of less than two years old. Deaths from cerebro-spinal fever numbered 4 ; and from typhus fever 2, one of which was registered in Glasgow, and the other in Greenock.

Deaths from influenza numbered 10 ; from puerperal septic conditions 5 ; and from malignant disease 166, of which 96 were ascribed to carcinoma, 19 to sarcoma, and 51 to other or not specified form of cancer. Deaths from heart disease (Classification numbers 77 to 80), excluding deaths certified as due to syncope and to heart failure, numbered 232 ; from apoplexy 130 ; from premature birth debility 90 ; and from alcoholism 6.

Deaths from pneumonia numbered 317, and constituted 11.4 per cent. of the total deaths ; they are 28 more than in January, and 70 more than in February of last year. Deaths from bronchitis numbered 302, and constituted 10.8 per cent. of the total deaths ; they are 90 more than in January, and 73 more than in February of last year.

Deaths ascribed to tuberculous disease numbered 302, and constituted 10.8 per cent. of the total deaths ; they are 8 more than in January, and 18 more than in February of last year. Of these deaths, 203 were ascribed to phthisis, the latter constituting 7.3 per cent. of the total deaths ; they are 29 more than in January, and 25 more than in February of last year. The death-rate from tuberculosis amounted to 2.1 per thousand, a rate which is 0.3 above that for January, and 0.1 above that for February of last year. This rate varied from 3.3 in Dundee to 1.2 in Aberdeen. In Glasgow, in Paisley, in Leith, and in Greenock it was 2.1, in Edinburgh 1.8, and in Perth 1.4.

Deaths from violence numbered 98 ; of them 6 were attributed to suicide, 3 being by cut-throat, and one each by precipitation, by hanging, and by drowning.

Among those whose deaths were registered in the eight towns during the month there were 4 males and 11 females aged 90 years and upwards, the oldest being a male of unspecified occupation aged 96 years.

#### BIRTHS, DEATHS, ETC., IN OTHER SELECTED REGISTRATION DISTRICTS.

On page 30 is given the usual monthly statement regarding the births, deaths and marriages registered in forty-nine selected registration districts. These districts have an estimated aggregate population of 855,912. Births registered in them during the month numbered 1581, deaths 1126 and marriages 261. The equivalent annual birth-rate is 24.1, the death-rate 17.2, and the marriage-rate 4.0. Compared with the returns for the corresponding month of last year, the birth-rate is 0.3 less, the death-rate 0.4 more, and the marriage rate 0.5 more.

Among the deaths registered in these districts during the month there were 3 from measles, 10 from scarlet fever, 67 from whooping-cough, 26 from diphtheria, 6 from enteric fever, 12 from diarrhoea, 1 from croup, 4 from laryngitis, 247 from pneumonia, bronchitis, and pleurisy, and 113 from tuberculosis.

# THE METEOROLOGICAL RETURNS

FOR

## EIGHT OF THE PRINCIPAL TOWNS IN SCOTLAND,

Reduced and corrected as heretofore for instrumental errors, give for their mean position, *i.e.*, Lat.  $56^{\circ}12'$  N., and Long.  $3^{\circ}30'$  W., and height 156 feet above the sea-level,

### For the month of FEBRUARY 1911.

Mean barometric pressure, 29.952 inches; greater than the average of 1856-1905 by 0.090 inch.

Mean temperature,  $39^{\circ}7$ ; greater by  $1^{\circ}0$ .

Mean daily range of temperature,  $11^{\circ}2$ ; greater by  $1^{\circ}5$ .

Rain, number of days, 17; greater by 2 days.

Rain, depth in inches, 3.96; greater by 1.09 inch.

Wind, direction of: a 7 days' excess of winds from between S. and W.

Hence the month of February 1911 was characterised by a rather high mean pressure; a rather high mean temperature, with a high mean daily range; a high mean rainfall; and a large excess of South-westerly winds.

The mean pressure was 29.952 inches, or 0.090 inch above the normal. From 1st to 8th the barometer remained at an exceptionally high level, being continuously above 30.5 inches at Leith. Thereafter conditions gradually became unsettled, and from 16th onwards pressure fluctuations were rapid and considerable, with some low readings. The range for the month was unusually large, the sea-level extremes at Leith being 30.812 inches on 1st and 28.664 inches on 23rd.

The mean temperature of  $39^{\circ}7$  was  $1^{\circ}0$  above the normal, this excess being chiefly due to the mildness of the days. Cold weather was experienced early in the month, with lowest readings on 1st, 2nd or 3rd; whilst a persistent South-westerly type during the latter half of the month was accompanied by very mild conditions, with highest readings, as a rule, about 21st. In most districts the mean temperature of the third week was from  $4^{\circ}$  to  $5^{\circ}$  above the normal. The extreme readings were  $59^{\circ}$  at Aberdeen on 16th and at Greenock on 22nd, and  $17^{\circ}$  at Perth on 2nd.

The mean rainfall was 3.96 inches, or 38 per cent. above the normal. There was a striking difference between the amounts at Eastern and Western stations. Aberdeen and Dundee, with little more than 1 inch, had a shortage of about 50 per cent.; Perth was slightly deficient; and the Edinburgh area had but little more than the normal. Greenock, on the other hand, with nearly 11 inches, had an excess of 70 per cent., whilst Paisley had fully twice its normal amount. The early part of the month was practically rainless, but between 15th and 22nd a succession of severe South-westerly storms brought heavy rainfalls to Western districts. Thus Greenock had as much as 2.35 inches on 17th, and more than 1 inch on 15th, 21st and 22nd. At Edinburgh the 22nd, with 0.66 inch, was the wettest day of the month; but at Dundee no day had as much as  $\frac{1}{4}$  inch.

Dense fog was widely experienced early in the month, whilst from 15th onwards the weather was more or less stormy. The heavy rains of 17th were accompanied by flooding in some Western districts.

Hail occurred at times, and on 22nd a thunderstorm at the Western towns and at Edinburgh.

ABSTRACT OF METEOROLOGICAL OBSERVATIONS

Made at GLASGOW, EDINBURGH, DUNDEE, ABERDEEN, PAISLEY, LEITH, GREENOCK, and PERTH,

During the Month of FEBRUARY 1911.

**REPORT.**

DURING the month of March 1911 there were registered in eight of the principal towns of Scotland, namely, Glasgow, Edinburgh, Dundee, Aberdeen, Paisley, Leith, Greenock, and Perth, the births of 4162 living children, of whom 2141 were males, and 2021 females. These births are 743 more than were registered in these towns in February, and 108 more than were there registered in March of last year. The equivalent annual birth-rate is 25·6 per thousand of the estimated aggregate population of these towns, a rate which is 2·3 above that for February, and 0·4 above that for March of last year. The birth-rate for the month ranged from 36·1 in Greenock to 19·4 in Edinburgh. In Leith it was 28·3, in Glasgow 27·6, in Paisley 25·1, in Dundee 24·7, in Perth 24·1, and in Aberdeen 23·7.

Of the 4162 children whose births were registered during the month, 327, or 7·9 per cent., were illegitimate. These children are 52 more than in the previous month, and 40 more than in the corresponding month of last year. The illegitimate rate for the month is 0·1 below that for the previous month, but is 0·8 above that for the corresponding month of last year.

Marriages registered during the month numbered 801; they are 33 more than in February, but 151 fewer than in March of last year. The equivalent annual marriage-rate is 4·9 per thousand, a rate which is 0·3 below that for February, and 1·0 below that for March of last year.

Deaths registered during the month numbered 2660; they are 125 fewer than in February, and 20 fewer than in March of last year. The equivalent annual death-rate is 16·3 per thousand, a rate which is 2·6 below that for February, and 0·4 below that for March of last year. It is the lowest death-rate for March yet recorded in these towns. The death-rate for the month ranged from 22·1 in Greenock to 12·9 in Aberdeen. In Dundee it was 20·5, in Perth 17·2, in Glasgow 16·6, in Edinburgh 15·3, in Paisley and in Leith 14·6. In all of these towns, with the exception of Greenock, the death-rate was lower than in February.

Of the 2660 deaths, 801, or 30·1 per cent., were of children of less than five years old, and 629, or 23·6 per cent., were of persons of over sixty-five. The former are 37 fewer than in February, and 123 fewer than in March of last year. The latter are 71 fewer than in February.

Deaths of children of less than one year old numbered 475 ; they are 30 fewer than in February, and 63 fewer than in March of last year. The infantile mortality rate is 123 per thousand of the average number of births registered monthly in these towns during the preceding twelve months, a rate which is 22 less than that for February, and 14 less than that for March of last year. This rate ranged from 191 in Perth to 87 in Leith. In Dundee it was 153, in Glasgow 130, in Greenock 126, in Aberdeen 111, in Edinburgh 103, and in Paisley 91.

Deaths from the principal epidemic diseases numbered 258 ; they are 27 fewer than in February, and are equal to an annual death-rate from these causes of 1·6 per thousand. This rate varied from 2·5 in Leith to 0·8 in Aberdeen. In Dundee it was 2·1, in Paisley 2·0, in Glasgow 1·8, in Perth 1·6, in Greenock 1·3, and in Edinburgh 1·1.

There were no deaths from small-pox or from typhus fever during the month. Fourteen deaths occurred from measles, of which 7 were in Glasgow and 6 in Edinburgh ; 18 from scarlet fever ; 146 from whooping-cough, of which 80 occurred in Glasgow ; 6 from enteric fever ; and 50 from diarrhoea, of which 42 were of children of less than two years old. Deaths from cerebro-spinal meningitis numbered 6, all of which were registered in Glasgow.

Deaths from influenza numbered 3 ; from puerperal sepsis 6 ; and from malignant disease 183, of which 118 were ascribed to carcinoma, 11 to sarcoma, and 54 to other or not specified form of malignant disease. Deaths from heart disease, excluding deaths from syncope and from heart failure, numbered 230 ; from apoplexy and hemiplegia 125 ; from premature birth 96 ; and from alcoholism 7.

Deaths from pneumonia numbered 291, and constituted 10·9 per cent. of the total deaths registered during the month ; they are 26 fewer than in February, and 2 fewer than in March of last year. Deaths from bronchitis numbered 206, and constituted 7·7 per cent. of the total deaths ; they are 96 fewer than in February, but 32 more than in March of last year.

The death-rate from all respiratory diseases, phthisis excluded, was 3·3 per thousand, a rate which is 1·3 below that for February. This death-rate ranged from 5·4 in Greenock to 2·0 in Leith. In Dundee it was 4·5, in Perth 4·4, in Paisley 3·7, in Glasgow 3·4, in Edinburgh 2·6, and in Aberdeen 2·2.

Deaths ascribed to tuberculous disease numbered 340, and constituted 12·8 per cent. of the total deaths ; they are 38 more than in February, and 39 more than in March of last year. Of these deaths, 220 were ascribed to phthisis, the latter constituting 8·3 per cent. of the total deaths ; they are 17 more than in February, and 29 more than in March of last year. The death-rate from tuberculosis amounted to 2·1 per thousand, a rate which is the same as that for February, and 0·2 above that for March of last year. This rate varied from 3·2 in Dundee to 1·6 in Paisley. In Greenock it was 2·5, in Leith 2·1, in Glasgow 2·0, in Edinburgh and in Perth 1·9, and in Aberdeen 1·7. The death-rate from phthisis was 1·4 per thousand, being the same as the rate for February, and 0·2 above the rate for March of last year.

Deaths from violence numbered 94 ; of them 5 were attributed to suicide, 2 being by hanging, 2 by cutting, and 1 by drowning.

Among those whose deaths were registered during the month, 3 males and 9 females were aged 90 years and upwards, the oldest being a widow aged 96 years.

---

#### BIRTHS, DEATHS, ETC., IN OTHER SELECTED REGISTRATION DISTRICTS.

On page 46 is given the usual monthly statement regarding the births, deaths, and marriages registered in forty-nine selected registration districts. These districts have an estimated aggregate population of 855,912. Births registered in them during the month numbered 1846, deaths 1161, and marriages 281. The equivalent annual birth-rate is 25·4, the death-rate 16·0, and the marriage-rate 3·9. Compared with the returns for the corresponding month of last year, the birth-rate is 0·9 higher, but the death-rate is 1·1 lower, and the marriage-rate 0·7 lower.

Among the deaths registered in these districts during the month there were 6 from measles, 7 from scarlet fever, 66 from whooping-cough, 15 from diphtheria, 9 from enteric fever, 21 from diarrhoea, 1 from croup, 221 from pneumonia, bronchitis, and pleurisy, and 142 from tuberculosis.

# THE METEOROLOGICAL RETURNS

FOR

## EIGHT OF THE PRINCIPAL TOWNS IN SCOTLAND,

Reduced and corrected as heretofore for instrumental errors, give for their mean position, *i.e.*, Lat.  $56^{\circ}12'$  N., and Long.  $3^{\circ}30'$  W., and height 156 feet above the sea-level,

### For the month of MARCH 1911.

Mean barometric pressure, 29.980 inches; greater than the average of 1856–1905 by 0.166 inch.

Mean temperature,  $40^{\circ}6$ ; greater by  $0^{\circ}3$ .

Mean daily range of temperature,  $9^{\circ}5$ ; less by  $2^{\circ}1$ .

Rain, number of days, 16; being the average.

Rain, depth in inches, 1.44; less by 1.00 inch.

Wind, direction of: an 8 days' excess of winds from N.E. and E.

Hence the month of March 1911 was characterised by a high mean pressure; a fractionally high mean temperature, with a low mean daily range; a low mean rainfall; and a large excess of North-easterly and Easterly winds.

The mean pressure was 29.980 inches, or 0.166 inch above the normal. The range for the month was unusually small, the extreme sea-level readings at Leith being 30.453 inches on 25th and 29.499 inches on 12th. From about 14th onwards pressure fluctuations were very small.

The mean temperature was  $40^{\circ}6$ , or  $0^{\circ}3$  above the normal, the days being  $0^{\circ}8$  below and the nights  $1^{\circ}3$  above their respective averages. At Aberdeen, Perth, and Paisley there was an excess of about  $1^{\circ}$ , whilst in the Edinburgh area there was a deficiency. Early in the month there was a continuance of the mild South-westerly type of conditions which had prevailed throughout February, but from about 13th onwards, with winds persistently from some easterly point, the day temperatures were much below the normal. At Edinburgh indeed the mean day temperature was actually lower than that for any of the three preceding months, and on no day after the 3rd did the thermometer there reach  $50^{\circ}$ , whilst on several days it failed to reach  $40^{\circ}$ . The extreme readings were  $56^{\circ}$  at Aberdeen and Leith on 3rd, and  $28^{\circ}$  at Perth on 7th.

The mean rainfall was 1.44 inch, or 41 per cent. below the normal. At Leith there was an excess, but at the other towns a decided deficiency, amounting to about 60 per cent. at Perth and Greenock. Somewhat heavy falls occurred on 1st, about  $\frac{3}{4}$  inch at Leith and Greenock, and some moderate falls in the East about the middle of the month, whilst many of the days characterised as "rain days" had quite nominal amounts. From 20th onwards there was little or no rain, whilst at Paisley no day after 10th had as much as one-tenth of an inch.

Early in the month the South-westerly winds at times reached gale force, whilst during the third week there were moderate falls of hail and sleet.

The prevailing Easterly winds were associated with rather cloudy skies on the East Coast, but with very sunny weather in the West.

ABSTRACT OF METEOROLOGICAL OBSERVATIONS

Made at GLASGOW, EDINBURGH, DUNDEE, ABERDEEN, PAISLEY, LEITH, GREENOCK, and PERTH,

During the Month of MARCH 1911.

**REPORT.**

NOTE.—The estimates of population now used are founded upon the numbers returned in the Summaries prepared by the Registrars after the recent Census, and will be employed until the revised details of the Census are obtained. All rates for previous months have been re-calculated on revised estimates.

DURING the month of April 1911 there were registered in eight of the principal towns of Scotland, namely, Glasgow, Edinburgh, Dundee, Aberdeen, Paisley, Leith, Greenock and Perth the births of 3711 living children, of whom 1904 were males, and 1807 females. These births are 451 fewer than were registered in these towns in March, and are 405 fewer than were there registered in April of last year. The equivalent annual birth-rate is 26·4 per thousand of the estimated aggregate population of these towns, a rate which is 2·3 below the revised birth-rate for March, and 3·0 below that for April of last year. The birth-rate for the month ranged from 36·7 in Greenock to 20·4 in Perth. In Dundee it was 29·9, in Glasgow 28·0, in Aberdeen 25·5, in Leith 23·8, in Paisley 22·4, and in Edinburgh 21·3.

Of the 3711 children whose births were registered during the month, 258, or 7·0 per cent., were illegitimate. These children are 69 fewer than in the previous month, and 27 fewer than in the corresponding month of last year. The illegitimate rate for the month is 0·9 below that for the previous month, but is 0·1 above that for the corresponding month of last year.

Marriages registered during the month numbered 1331; they are 530 more than in March, and 219 more than in April of last year. The equivalent annual marriage-rate is 9·5 per thousand, a rate which is 4·0 above the revised rate for March, and 1·6 above that for April of last year.

Deaths registered during the month numbered 2553; they are 107 fewer than in March, and 178 fewer than in April of last year. The equivalent annual death-rate is 18·2 per thousand, a rate which is 0·1 below the revised rate for March, and 1·3 below that for April of last year. The death-rate for the month ranged from 22·1 in Greenock to 13·9 in Aberdeen. In Paisley it was 21·9, in Dundee 19·2, in Edinburgh 18·5, in Glasgow 18·2, in Perth 18·0, and in Leith 15·4. In Edinburgh, in Paisley, and in Greenock this rate was higher than the revised rate for the previous month, but in the other towns it was lower.

Of the 2553 deaths, 795, or 31·1 per cent., were of children of less than five

years old, and 629, or 24·6 per cent., were of persons of over sixty-five. The former are 6 fewer than in March, and 205 fewer than in April of last year: the latter number the same as in March.

Deaths of children of less than one year old numbered 455; they are 20 fewer than in March, and 72 fewer than in April of last year. The infantile mortality rate is 123 per thousand of the average number of births registered monthly in these towns during the preceding twelve months, a rate which is the same as that for March, but is 17 below that for April of last year. This rate ranged from 163 in Paisley to 81 in Leith. In Aberdeen it was 145, in Edinburgh 136, in Dundee 124, in Glasgow 120, in Perth 94, and in Greenock 85.

Deaths from the principal epidemic diseases numbered 291; they are 33 more than in March, and are equal to an annual death-rate from these causes of 2·1 per thousand. This rate varied from 5·5 in Paisley, where it was due to an epidemic of whooping-cough, to 0·3 in Aberdeen. In Glasgow it was 2·6, in Perth 2·0, in Dundee 1·7, in Leith 1·5, in Edinburgh 1·4, and in Greenock 1·3.

There were no deaths from small-pox or from typhus fever during the month. Deaths from measles numbered 33; from scarlet fever 9; from whooping-cough 183, of which 104 occurred in Glasgow, and 32 in Paisley; from diphtheria 25; from enteric fever 4; and from diarrhoea 37, of which 31 were of children of less than two years old. Deaths from cerebro-spinal meningitis numbered 6, 4 of which occurred in Glasgow and 2 in Edinburgh.

Deaths from influenza numbered 9; from puerperal sepsis 16; and from malignant disease 143, of which 77 were ascribed to carcinoma, 7 to sarcoma, and 59 to other or unspecified form of malignant disease; from heart disease, excluding those certified as due to syncope and heart failure, 209; from apoplexy and hemiplegia 114; from premature birth 69; and from alcoholism 9.

Deaths from pneumonia numbered 329, and constituted 12·9 per cent. of the total deaths; they are 38 more than in March, and 35 more than in April of last year. Deaths from bronchitis numbered 200, and constituted 7·8 per cent. of the total deaths; they are 6 fewer than in March, but 30 more than in April of last year.

The death-rate from all respiratory diseases, phthisis excluded, was 4·1 per thousand, a rate which is 0·4 above that for March. This death-rate ranged from 6·0 in Greenock to 3·0 in Aberdeen. In Glasgow it was 4·7, in Leith 3·8, in Dundee 3·7, in Edinburgh 3·6, in Perth 3·4, and in Paisley 3·3.

Deaths ascribed to tuberculous disease numbered 323, and constituted 12·7 per cent. of the total deaths; they are 17 fewer than in March, and 33 fewer than in April of last year. Of these deaths, 208 were ascribed to phthisis, the latter constituting 8·1 per cent. of the total deaths; they are 12 fewer than in March, and 4 fewer than in April of last year. The death-rate from tuberculosis amounted to 2·3 per thousand, a rate which is the same as that for March, but is 0·2 below that for April of last year. This rate varied from 4·4 in Greenock to 1·6 in Edinburgh. In Dundee it was 3·7, in Perth 3·4, in Glasgow and in Paisley 2·2, in Leith 2·1, and in Aberdeen 1·9. The death-rate from phthisis was 1·5 per thousand, being the same as that for March, and the same as that for April of last year.

Deaths from violence numbered 87; of them 5 were attributed to suicide, 3 being by cutting, and 1 each by gunshot wound and by hanging.

Among those whose deaths were registered during the month, 2 males and 14 females were aged 90 years and upwards, the oldest being a widow aged 93 years.

---

#### BIRTHS, DEATHS, ETC., IN OTHER SELECTED REGISTRATION DISTRICTS.

On page 62 is given the usual monthly statement regarding the births, deaths, and marriages registered in forty-nine selected registration districts. These districts have an estimated aggregate population of 821,272. Births registered in them during the month numbered 1834, deaths 1110, and marriages 404. The equivalent annual birth-rate is 27·2, the death-rate 16·5, and the marriage-rate 6·0. Compared with the returns for the corresponding month of last year, the birth-rate is 0·2 higher, the death-rate 0·4 lower, and the marriage-rate 0·5 higher.

Among the deaths registered in these districts during the month there were 5 from measles, 3 from scarlet fever, 57 from whooping-cough, of which 12 occurred in Dumbarton, 12 in Govan, and 9 in Partick, 13 from diphtheria, 5 from enteric fever, 19 from diarrhoea, 3 from laryngitis, 208 from bronchitis, pneumonia, and pleurisy, and 124 from tuberculosis.

120	Bright's Disease, Uræmia - - - - -	41	-	-	16	7	23	-	-	4	6	10	-	-	-	2	2
122	Other Diseases of Kidney, Chyluria (121) -	3	-	-	-	-	-	-	-	2	-	2	-	-	-	-	-
123	Urinary Calculus - - - - -	1	-	-	-	-	-	-	-	1	-	1	-	-	-	-	-
124	Diseases of Bladder - - - - -	8	-	-	1	1	2	-	-	2	2	4	-	-	1	-	1
125	Diseases of Urethra, Urinary Abscess -	2	-	-	-	-	-	-	-	1	-	1	-	-	1	-	1
126	Diseases of Prostate - - - - -	5	-	-	-	3	3	-	-	1	-	1	-	-	-	-	-
127	Diseases of Male Genital Organs (not Venereal).	-	-	-	-	-	-	-	-	-	-	-	-	-	-	-	-
128	Menorrhagia, Uterine Hæmorrhage (not Puerperal).	1	-	-	1	-	1	-	-	-	-	-	-	-	-	-	-
129	Uterine Tumour (non-Cancerous) - -	-	-	-	-	-	-	-	-	-	-	-	-	-	-	-	-
130	Other Diseases of Uterus - - - - -	4	-	-	2	-	2	-	-	-	-	-	-	-	-	-	-
131	Cysts, and Other Tumours of Ovary -	2	-	-	-	-	-	-	1	1	-	2	-	-	-	-	-
132	Other Diseases of Female Genital Organs -	3	-	-	-	-	-	-	-	2	-	2	-	-	1	-	1
133	Non-puerperal Diseases of Breast - -	-	-	-	-	-	-	-	-	-	-	-	-	-	-	-	-
VII. DISEASES OF PREGNANCY AND CHILDBIRTH.																	
134 (a)	Abortion, Miscarriage - - - - -	1	-	-	-	-	-	-	1	-	-	1	-	-	-	-	-
(c)	Uncontrollable Vomiting - - - - -	1	-	-	-	-	-	-	-	1	-	1	-	-	-	-	-
(d)	Ectopic Gestation - - - - -	-	-	-	-	-	-	-	-	-	-	-	-	-	-	-	-
(e)	Other Diseases and Accidents of Pregnancy (b).	2	-	-	-	-	-	-	-	1	-	1	-	-	-	-	-
135	Puerperal Hæmorrhage - - - - -	6	-	1	1	-	2	-	-	-	-	-	-	-	1	-	1
136	Other Accidents of Childbirth - - - - -	2	-	-	-	-	-	-	1	-	-	1	-	-	-	-	-
137	Puerperal Sepsis - - - - -	16	-	4	6	-	10	-	1	1	-	2	-	1	2	-	3
138	Puerperal Albuminuria, Convulsions -	5	-	1	2	-	3	-	-	2	-	2	-	-	-	-	-
139	Puerperal Phlegmasia Alba Dolens, Phlebitis, Embolism.	1	-	-	-	-	-	-	-	1	-	1	-	-	-	-	-
140 (a)	Puerperal Insanity - - - - -	-	-	-	-	-	-	-	-	-	-	-	-	-	-	-	-
(b)	Other Puerperal Diseases - - - - -	3	-	-	3	-	3	-	-	-	-	-	-	-	-	-	-
141	Puerperal Diseases of Breast - - - - -	1	-	-	-	-	-	-	-	-	-	-	-	-	-	-	-
VIII. DISEASES OF SKIN AND CELLULAR TISSUE.																	
142 (a)	Senile Gangrene - - - - -	6	-	-	-	-	-	-	-	-	3	3	-	-	-	1	1
(b)	Noma, Cancrum Oris - - - - -	-	-	-	-	-	-	-	-	-	-	-	-	-	-	-	-
(d)	Other Gangrene (c) - - - - -	1	-	-	1	-	1	-	-	-	-	-	-	-	-	-	-
143	Carbuncle, Boil - - - - -	2	-	-	-	-	-	-	-	-	2	2	-	-	-	-	-
144	Phlegmon, Acute Abscess - - - - -	6	-	-	-	-	-	-	1	2	-	3	-	-	-	-	-
145	Ulcer, Other Diseases of Skin and Cellular Tissue.	3	-	-	-	1	1	-	-	-	-	-	-	-	1	-	1
IX. DISEASES OF ORGANS OF LOCOMOTION.																	
146	Diseases of Bones (Mastoid excluded) -	8	-	3	1	-	4	-	1	-	-	1	-	2	-	-	2
147	Diseases of Joints - - - - -	1	-	-	-	-	-	-	-	-	-	-	-	-	-	-	-
149	Other Diseases of Locomotor System (148)	-	-	-	-	-	-	-	-	-	-	-	-	-	-	-	-

# THE METEOROLOGICAL RETURNS

FOR

## EIGHT OF THE PRINCIPAL TOWNS IN SCOTLAND,

Reduced and corrected as heretofore for instrumental errors, give for their mean position, *i.e.*, Lat.  $56^{\circ}12'$  N., and Long.  $3^{\circ}30'$  W., and height 156 feet above the sea-level,

For the month of APRIL 1911.

Mean barometric pressure, 29·925 inches ; greater than the average of 1856–1905 by 0·032 inch.

Mean temperature,  $45^{\circ}4$  ; greater by  $0^{\circ}6$ .

Mean daily range of temperature,  $13^{\circ}1$  ; less by  $0^{\circ}9$ .

Rain, number of days, 16 ; greater by 2 days.

Rain, depth in inches, 1·93 ; less by 0·16 inch.

Wind, direction of : a 2 days' excess of winds from N. and N.E. and a 3 days' excess of winds from S.W. and W.

Hence the month of April 1911 was characterised by a slightly high mean pressure ; a slightly high mean temperature, with a slightly low mean daily range ; a slightly low mean rainfall ; and an excess of winds from a Northerly and also from a South-westerly quarter.

The mean pressure was 29·925 inches, or 0·032 inch above the normal. Until about 14th there was a continuance of the steady high pressure conditions which had prevailed during the latter half of March, but thereafter fluctuations were considerable with somewhat low readings about 19th and 27th. At Leith the extremes at sea-level were 30·519 inches on 5th and 29·185 inches on 27th.

The mean temperature was  $45^{\circ}4$ , or  $0^{\circ}6$  above the normal, the slight excess being due almost entirely to the relative mildness of the nights. Of the individual towns Glasgow, Greenock, and Perth had practically their average temperatures. Early in the month, with winds from North and North-east, decidedly cold weather was experienced ; but thereafter, with winds as a rule from South-west or West, temperature was frequently above the average, with highest readings for the month on 13th and 22nd. Lowest readings occurred very generally on 6th, the extremes being  $65^{\circ}$  at Paisley on 13th and at Aberdeen on 22nd, and  $21^{\circ}$  at Perth on 6th.

The mean rainfall was 1·93 inch, or 8 per cent. below the normal, and there was a well-marked contrast between East and West. Thus Dundee and Perth had aggregates of less than 1 inch, representing less than half their normal rainfalls, and the other Eastern towns comparatively small amounts. In the West, on the other hand, there was a decided excess, as much as 60 per cent. at Paisley. The drought of the latter part of March continued practically unbroken during the first two weeks of April, whilst from 15th to 29th rain fell on every day at the Western towns, with falls of half an inch or more at Greenock on four days. At Dundee falls exceeding one-tenth of an inch occurred only on 24th and 25th, the total for these two days representing nearly half the month's small aggregate.

Early in the month there were trifling falls of snow and hail, and during the third week the weather was at times stormy.

A thunderstorm at Aberdeen on afternoon of 26th.

ABSTRACT OF METEOROLOGICAL OBSERVATIONS

Made at GLASGOW, EDINBURGH, DUNDEE, ABERDEEN, PAISLEY, LEITH, GREENOCK, and PERTH,

During the Month of APRIL 1911.

**REPORT.**

NOTE.—The estimates of population now used are founded upon the numbers returned in the Summaries prepared by the Registrars after the recent Census, and will be employed until the revised details of the Census are obtained. All rates for previous months have been re-calculated on revised estimates.

DURING the month of May 1911 there were registered in eight of the principal towns of Scotland, namely, Glasgow, Edinburgh, Dundee, Aberdeen, Paisley, Leith, Greenock and Perth, the births of 4315 living children, of whom 2199 were males, and 2116 females. These births are 604 more than those registered in the eight towns during April, and 25 more than were registered during May of last year. The equivalent annual birth-rate is 29·7 per thousand, which rate is 3·3 above that of April and 0·1 above that of May of last year. The birth-rate of the month ranged from 35·4 in Greenock to 25·2 in Edinburgh. In Paisley it was 32·3, in Glasgow 31·6, in Dundee 30·1, in Leith 28·3, in Perth 26·9, and in Aberdeen 26·5.

Of the 4315 children whose births were registered during the month, 321, or 7·4 per cent., were illegitimate. These illegitimate births are 63 more than in the previous month, but 7 fewer than in the corresponding month of last year. The illegitimate rate of the month is 0·4 above that of the previous month, but 0·2 below that of the corresponding month of last year.

Marriages registered in these towns during the month numbered 660. They are 671 fewer than in April, and 3 fewer than in May of last year. The equivalent annual marriage-rate is 4·5 per thousand, which is 5·0 below that of April, and 0·1 below that of May of last year.

Deaths registered during the month numbered 2542; they are 11 fewer than in April, but 129 more than in May of last year. The equivalent annual death-rate is 17·5 per thousand, and is 0·7 below that of April, but 0·8 above that of May of last year. The death-rate of the month ranged from 22·8 in Greenock to 13·3 in Leith. In Glasgow it was 18·1, in Edinburgh 17·5, in Dundee 17·4, in Perth 17·1, in Paisley 15·9, and in Aberdeen 15·3. The monthly death-rates in Aberdeen and Greenock are higher than in the previous month, but those in the remaining towns are lower.

Of the 2542 deaths, 831, or 32·7 per cent., were of children of less than five

years old, and 541, or 21·3 per cent., were of persons of over sixty-five. The former are 36 more than in April, and 24 more than in May of last year: the latter are 88 fewer than in April.

Deaths of children of less than one year old numbered 512; they are 57 more than in April, and 77 more than in May of last year. The infantile mortality rate is 134 per thousand of the average number of births registered monthly in these towns during the preceding twelve months, a rate which is 11 above that of April and 23 above that of May of last year. This rate for the month varied from 148 in Edinburgh to 64 in Leith. In Aberdeen it was 140, in Glasgow 138, in Dundee 132, in Greenock 131, in Paisley 120, and in Perth 103.

Deaths from the principal epidemic diseases, namely, small-pox, measles, scarlet fever, whooping-cough, diphtheria, enteric fever and diarrhoea, numbered 323, and are 32 more than in April, and 47 more than in May of last year. The death-rate from these causes amounted to 2·2 per thousand, and varied from 2·9 in Glasgow to 1·2 in Aberdeen. In Perth this rate was 2·3, in Paisley, 2·1, in Greenock 1·9, in Dundee 1·8, in Edinburgh 1·6, and in Leith 1·3. These deaths include 1 from small-pox, 50 from measles (of which 38 were in Glasgow), 17 from scarlet fever, 186 from whooping-cough (of which 117 were in Glasgow), 16 from diphtheria, 7 from enteric fever, and 46 from diarrhoea (of which 33 were of children of less than 2 years old). The small-pox death was registered in Dundee. Deaths from cerebro-spinal meningitis numbered 7, all of which occurred in Glasgow.

Deaths from influenza numbered 2; from puerperal septic conditions 6; from malignant disease 173, of which 107 were ascribed to carcinoma, 7 to sarcoma, and 59 to other or unspecified form of malignant disease. Deaths from heart disease, excluding those certified as due to syncope or heart failure, numbered 225; from apoplexy and hemiplegia 133; from premature birth debility 99; and from alcoholism 6.

Deaths from pneumonia numbered 181, and constituted 7·1 per cent. of the total deaths; they are 148 fewer than in April and 43 fewer than in May of last year. Deaths from bronchitis numbered 149, and constituted 5·9 per cent. of the total deaths; they are 51 fewer than in April, and 17 fewer than in May of last year.

The death-rate from all respiratory diseases, phthisis excluded, was 2·5 per thousand, and is 1·6 less than that of April. This death-rate ranged from 3·0 in Greenock to 2·3 in Perth and Aberdeen. In Dundee it was 2·9, in Paisley 2·9, in Glasgow 2·5, in Leith 2·5, and in Edinburgh 2·4.

Deaths ascribed to tuberculous disease numbered 348. They are 25 more than in April, and 34 more than in May of last year. Of these deaths, 214 were ascribed to phthisis, the latter being 6 more than in April and 25 more than in May of last year. The total deaths from tubercle amounted to 13·7 per cent. of the total deaths of the month, and those from phthisis to 8·4 per cent. The death-rate from tubercle was 2·4 per thousand, a rate which is 0·1 above that for April, and 0·2 above that for May of last year. This rate varied from 4·1 in Greenock to 1·3 in Paisley. In Perth it was 3·3, in Dundee 2·9, in Glasgow 2·4, in Leith 2·2, in Edinburgh 2·1, and in Aberdeen 2·1. The death-rate from phthisis amounted to 1·5 per thousand, being the same as in April, but 0·2 more than in May of last year.

Deaths from violence numbered 109; of them 12 were suicidal, 4 being by poisoning, 3 by cut-throat, 3 by hanging, and 2 by drowning.

Among those whose deaths were registered during the month were 5 females aged 90 years and upwards, the oldest being a spinster aged 94.

#### BIRTHS, DEATHS, ETC., IN OTHER SELECTED REGISTRATION DISTRICTS.

On page 78 is given the usual monthly statement regarding the births, deaths, and marriages registered in forty-nine selected registration districts. These districts have an estimated aggregate population of 821,272. Births registered in them during the month numbered 2025, deaths 1078, and marriages 191. The equivalent annual birth-rate is 29·1 per thousand, the death-rate 15·5, and the marriage-rate 2·7. Compared with the corresponding rates of the previous May, the birth-rate is 1·0 more, the marriage-rate 0·3 more, and the death-rate 0·9 less.

Among the deaths registered in these districts during the month there were 13 from measles, 5 from scarlet fever, 45 from whooping-cough, 5 from diphtheria, 6 from enteric fever, 21 from diarrhoea, 1 from laryngitis, 123 from pneumonia, bronchitis, and pleurisy, 155 from tuberculous disease, and 1 from cerebro-spinal meningitis.

# THE METEOROLOGICAL RETURNS

FOR

## EIGHT OF THE PRINCIPAL TOWNS IN SCOTLAND,

Reduced and corrected as heretofore for instrumental errors, give for their mean position, *i.e.*, Lat.  $56^{\circ}12'$  N., and Long.  $3^{\circ}30'$  W., and height 156 feet above the sea-level,

### For the month of MAY 1911.

Mean barometric pressure, 29·977 inches; greater than the average of 1856–1905 by 0·029 inch.

Mean temperature,  $53^{\circ}2$ ; greater by  $3^{\circ}8$ .

Mean daily range of temperature,  $16^{\circ}4$ ; greater by  $1^{\circ}4$ .

Rain, number of days, 12; less by 2 days.

Rain, depth in inches, 1·91; less by 0·26 inch.

Wind, direction of: a 2 days' excess of winds from E. and a 3 days' excess of winds from S. and S.W.

Hence the month of May 1911 was characterised by a slightly high mean pressure; an extremely high mean temperature, with a rather high mean daily range; a slightly low mean rainfall; and an excess of winds from an Easterly and also from a South-westerly quarter.

The mean pressure was 29·977 inches, or 0·029 inch above the normal. At Leith the sea-level extremes were 30·371 inches on 29th and 29·385 inches on 3rd, and pressure there was above 30 inches from 6th to 12th, from 18th to 21st, and from 27th to 31st.

The mean temperature was  $53^{\circ}2$ , or  $3^{\circ}8$  above the normal, the days being  $4^{\circ}5$  and the nights  $3^{\circ}1$  above their respective averages. Since observations were organised more than fifty years ago, an appreciably warmer May has occurred only in 1896, when the mean was  $5^{\circ}0$  above the normal. After the first week or so temperature was continuously above the average, and during the last few days the thermometer, especially in Western districts, reached an unusually high level for the time of year. The highest reading was  $78^{\circ}$  at Paisley on 30th, and the lowest  $32^{\circ}$  at Perth on 6th.

The mean rainfall was 1·91 inch, or 12 per cent. below the normal, but the distribution was irregular. At Aberdeen, Paisley, and Greenock there was an excess of 20 per cent. or more, but at the other towns a shortage, and Dundee and Perth had aggregates of less than one inch, representing less than half their normal amounts. Falls of half an inch or more occurred at Paisley on 1st and 3rd; at Greenock on 1st, 2nd, 3rd, and 7th; and at Aberdeen on 13th, 14th, and 15th, whilst the latter half of the month was all but rainless. At Dundee, indeed, no rain was registered after the 14th.

Thunderstorms occurred in the West on 13th and 14th.

Large amounts of sunshine were experienced, and the month was on the whole the sunniest May since 1901.

ABSTRACT OF METEOROLOGICAL OBSERVATIONS

Made at GLASGOW, EDINBURGH, DUNDEE, ABERDEEN, PAISLEY, LEITH, GREENOCK, and PERTH,

During the Month of MAY 1911.

**REPORT.**

NOTE.—The estimates of population now used are founded upon the numbers returned in the Summaries prepared by the Registrars after the recent Census, and will be employed until the revised details of the Census are obtained. All rates for previous months which are quoted in this Report have been re-calculated on revised estimates.

DURING the month of June 1911 there were registered in eight of the principal towns of Scotland, viz., Glasgow, Edinburgh, Dundee, Aberdeen, Paisley, Leith, Greenock and Perth, the births of 3925 living children, of whom 2022 were males, and 1903 females. These births are 390 fewer than in May, and 130 fewer than in June of last year. The equivalent annual birth-rate is 27·9 per thousand. It is 1·8 less than that of May, and 1·0 less than that of June of last year. The birth-rate of the month varied from 29·9 in Dundee and 29·3 in Glasgow to 22·4 in Perth and 24·6 in Edinburgh. In Aberdeen and Greenock it was 28·1, in Leith 27·9, and in Paisley 26·6.

Of the 3925 children whose births were registered during the month, 322, or 8·2 per cent., were illegitimate. These illegitimate births are 1 more than in the previous month, and 32 more than in June of last year. The illegitimate rate of the month is 0·8 more than in May and 1·0 more than in the corresponding month of last year.

Marriages registered during the month numbered 2080. They are 1420 more than in May and 103 more than in June of last year. The equivalent annual marriage-rate is 14·8 per thousand, being 10·3 above that for May, and 0·7 above that for June of last year.

Deaths registered during the month numbered 2038. They are 504 fewer than in May and 125 fewer than in June of last year. The equivalent annual death-rate is 14·5 per thousand. It is 3·0 less than in May and 0·9 less than in June of last year. The death-rate of the month varied from 16·5 in Greenock and 15·7 in Paisley to 11·0 in Aberdeen and 13·4 in Leith. In Glasgow it was 15·4, in Perth 15·3, in Dundee 14·6, and in Edinburgh 13·5. The Leith death-rate in June is slightly higher than what it was in May, but those in the remaining seven Principal Towns are lower.

Of the 2,038 deaths, 618, or 30·3 per cent., were of children of less than five years old, while 430, or 21·1 per cent., were of persons of over sixty-five. The former

are 213 fewer than in May, and 11 fewer than in June of last year. The latter are 111 fewer than in May.

Deaths of children of under one year old numbered 350. They are 162 fewer than in May and 32 fewer than in June of last year. The infantile mortality rate is 95 per thousand of the average number of births registered monthly in these towns during the preceding twelve months, a rate which is 39 less than that of May and 6 less than that of June of last year. This rate for the month varied from 143 in Paisley and 127 in Dundee to 77 in Edinburgh and 79 in Greenock. In Leith it was 95, in Glasgow 92, in Perth 92, and in Aberdeen 90.

Deaths from the principal epidemic diseases, namely, small-pox, measles, scarlet fever, whooping-cough, diphtheria, enteric fever and diarrhoea, numbered 273. They are 50 fewer than in the previous month, but 96 more than in the corresponding month of last year. The death-rate from these causes was 1·9 per thousand, and varied from 4·4 in Perth and 2·4 in Glasgow to 1·1 in Dundee and Leith. In Paisley it was 2·3, in Greenock 1·9, in Edinburgh 1·4, and in Aberdeen 1·3. These deaths include 58 from measles, 9 from scarlet fever, 127 from whooping-cough, 17 from diphtheria, 3 from enteric fever, and 59 from diarrhoea (of which 43 were of children of less than 2 years old). Seven deaths from cerebro-spinal meningitis were registered during the month. Of them 2 were in Glasgow, 1 in Edinburgh, 2 in Dundee, 1 in Aberdeen, and 1 in Paisley.

Deaths from puerperal septic conditions numbered 9, from malignant disease 164, of which 104 were ascribed to carcinoma, 8 to sarcoma, and 52 to other or unspecified form of cancer. Deaths from heart disease numbered 165, from apoplexy and hemiplegia 117, from premature birth debility 58, and from alcoholism 4.

Deaths from pneumonia numbered 150, and constituted 7·4 per cent. of the total. They are 31 fewer than in the previous month, and 20 fewer than in June of last year. Deaths from bronchitis numbered 72, and constituted 3·5 per cent. of the total. They are 77 fewer than in the previous month, and 28 fewer than in the corresponding month of last year.

The death-rate from all respiratory diseases, phthisis excluded, was 1·7 per thousand, and is 0·8 less than the corresponding rate in May. The death-rate from these causes ranged from 2·1 in Glasgow and 1·9 in Greenock to 0·7 in Perth. In Leith it was 1·7, in Paisley 1·6, in Edinburgh 1·4, and in Dundee and in Aberdeen 1·3.

Deaths ascribed to tuberculous disease numbered 307, and constituted 15·1 per cent. of the total deaths of the month. They are 41 fewer than in May, and 29 fewer than in June of last year. Of these deaths 191, or 9·4 per cent. of the total deaths, were attributed to phthisis. The death-rate from all tuberculous disease amounted to 2·2 per thousand, and from phthisis to 1·4. The former death-rate varied from 3·1 in Greenock and 3·0 in Dundee to 1·3 in Aberdeen and 1·6 in Paisley. The latter rate varied from 1·7 in Perth and 1·5 in Glasgow, Dundee and Greenock to 1·0 in Aberdeen and 1·1 in Edinburgh. The death-rate from tuberculosis is 0·2 less than that of May, and the death-rate from phthisis is 0·1 less.

Deaths ascribed to violent causes numbered 62. Of them 8 were suicidal, 5 being by hanging, and one each by cut-throat, precipitation, and by a method not specified.

Among those whose deaths were registered during the month there were 1 male and 5 females aged 90 years and upwards, the oldest of them being a stationer, and two widows each aged 92.

#### BIRTHS, DEATHS, ETC., IN OTHER SELECTED REGISTRATION DISTRICTS.

On page 94 is given the usual monthly statement regarding the births, deaths, and marriages registered in forty-nine selected registration districts. These districts have an estimated aggregate population of 821,272. Births registered in them during the month numbered 1816, deaths 907, and marriages 726. The equivalent annual birth-rate is 26·9 per thousand, the death-rate 13·4, and the marriage-rate 10·8. Compared with the corresponding rates of the previous June, the birth-rate is the same, the death-rate 1·1 less, and the marriage-rate 0·9 more.

Among the deaths registered in these districts during the month there were 8 from measles, 3 from scarlet fever, 32 from whooping-cough, 4 from diphtheria, 3 from enteric fever, 23 from diarrhoea, 2 from laryngitis, 123 from pneumonia, bronchitis, and pleurisy, 144 from tuberculous disease, and 2 from cerebro-spinal meningitis, which were registered in Dunfermline and in Falkirk respectively.

TABLE I.—ABSTRACT OF BIRTHS, DEATHS, AND MARRIAGES,  
JUNE 1911.

# THE METEOROLOGICAL RETURNS

FOR

## EIGHT OF THE PRINCIPAL TOWNS IN SCOTLAND,

Reduced and corrected as heretofore for instrumental errors, give for their mean position, *i.e.*, Lat.  $56^{\circ}12'$  N., and Long.  $3^{\circ}30'$  W., and height 156 feet above the sea-level,

For the month of JUNE 1911.

Mean barometric pressure, 29·937 inches ; less than the average of 1856–1905 by 0·012 inch.

Mean temperature,  $56^{\circ}2$  ; greater by  $0^{\circ}8$ .

Mean daily range of temperature,  $17^{\circ}0$  ; greater by  $1^{\circ}7$ .

Rain, number of days, 12 ; less by 1 day.

Rain, depth in inches, 2·24 ; less by 0·02 inch.

Wind, direction of : a 2 days' excess of winds from N. and N.W.

Hence the month of June 1911 was characterised by a slightly low mean pressure ; a slightly high mean temperature, with a rather large mean daily range ; a mean rainfall equal to the normal ; and a slight excess of winds from N. and N.W.

The mean pressure was 29·937 inches, or 0·012 inch below the normal. At Leith the sea-level extremes were 30·544 inches on 6th and 29·401 inches on 18th, and pressure there was above 30 inches from 1st to 11th, and from 14th to 16th.

The mean temperature was  $56^{\circ}2$ , or  $0^{\circ}8$  above the normal, the days being  $1^{\circ}6$  above and the nights  $0^{\circ}1$  below their respective averages. Early in the month there was a continuance of the warm weather for which May had been remarkable, and some North-western stations had for the week ending June 3rd a mean temperature from  $10^{\circ}$  to  $12^{\circ}$  above the normal. About the middle of the month winds from North and North-west caused a considerable fall of temperature, whilst during the last week or so conditions differed little from the normal. The temperature range was unusually large, the highest reading at the chief towns being  $81^{\circ}$  at Leith on 7th and the lowest  $32^{\circ}$  at Perth on 13th and 14th.

The mean rainfall was 2·24 inches, or 1 per cent. below the normal. At Dundee, Perth, and Glasgow there was a shortage, the aggregate at Dundee being less than 1 inch, whilst at the other towns there was a decided excess, as much as 50 per cent. at Paisley. The drought of the latter half of May was prolonged during the first half of June, but from 16th to 24th conditions were very unsettled, with heavy falls on various days,—more than 1 inch at Paisley on 17th, at Greenock on 21st, and at Aberdeen and Edinburgh on 24th, and nearly 1 inch at Leith on 19th. On 24th Duns in Berwickshire had more than 3 inches. It is noteworthy that at Dundee no day had as much as one quarter of an inch.

Thunder occurred on 1st ; and thunderstorms of considerable intensity in the West on 17th and 18th, and in the East on 19th.

ABSTRACT OF METEOROLOGICAL OBSERVATIONS

Made at GLASGOW, EDINBURGH, DUNDEE, ABERDEEN, PAISLEY, LEITH, GREENOCK, and PERTH,

During the Month of JUNE 1911.

**REPORT.**

NOTE.—The estimates of population now used are founded upon the numbers returned in the Summaries prepared by the Registrars after the recent Census, and will be employed until the revised details of the Census are obtained. All rates for previous months which are quoted in this Report have been re-calculated on revised estimates.

DURING the month of July 1911 there were registered in eight of the principal towns of Scotland, viz., Glasgow, Edinburgh, Dundee, Aberdeen, Paisley, Leith, Greenock and Perth, the births of 3649 living children, of whom 1868 were males, and 1781 females. These births are 276 fewer than in June, and 76 fewer than in July of last year. The equivalent annual birth-rate is 25·1 per thousand, a rate which is 2·8 less than in June, and 0·6 less than in July of last year. The birth-rate for the month ranged from 32·9 in Greenock to 19·9 in Edinburgh. In Glasgow it was 27·2, in Dundee 26·4, in Paisley 26·3, in Leith 22·8, in Aberdeen 22·1, and in Perth 20·7.

Of the 3649 children whose births were registered during the month, 306, or 8·4 per cent., were illegitimate. These illegitimate births are 16 fewer than in the previous month, but 22 more than in July of last year. The illegitimate rate for the month is 0·2 more than in June, and 0·8 more than in July of last year.

Marriages registered during the month numbered 1923. They are 157 fewer than in June, but 160 more than in July of last year. The equivalent annual marriage-rate is 13·2 per thousand, a rate which is 1·6 below that for June, but 1·0 above that for July of last year.

Deaths registered during the month numbered 2100. They are 62 more than in June, and 212 more than in July of last year. The equivalent annual death-rate is 14·5 per thousand, a rate which is the same as that for June, but is 1·5 above that for July of last year. The death-rate for the month ranged from 18·0 in Greenock to 11·0 in Aberdeen. In Edinburgh it was 15·5, in Glasgow 15·4, in Perth 13·5, in Leith 12·7, in Dundee 12·6, and in Paisley 11·6. In Edinburgh and in Greenock the death-rate was higher than in June, in Glasgow and in Aberdeen it was the same, but in the other towns it was lower.

Of the 2100 deaths, 645, or 30·7 per cent., were of children of less than five years old, while 465, or 22·1 per cent., were of persons of over sixty-five. The former

are 27 more than in June, and 80 more than in July of last year. The latter are 35 more than in June.

Deaths of children of less than one year old numbered 408. They are 58 more than in June, and 67 more than in July of last year. The infantile mortality rate is 107 per thousand of the average number of births registered monthly in these towns during the preceding twelve months, a rate which is 12 more than in June, and 19 more than in July of last year. The rate for the month ranged from 120 in Glasgow to 72 in Paisley. In Greenock it was 117, in Edinburgh 114, in Perth 106, in Leith 92, in Dundee 84, and in Aberdeen 74.

Deaths from the principal epidemic diseases, namely, small-pox, measles, scarlet fever, whooping-cough, diphtheria, enteric fever and diarrhoea, numbered 277. They are 4 more than in June, and 136 more than in July of last year. The death-rate from these causes was 1·9 per thousand, and ranged from 2·5 in Glasgow to 0·8 in Aberdeen. In Greenock it was 2·2, in Perth 2·0, in Edinburgh 1·7, in Leith 1·5, in Dundee 1·1, and in Paisley 1·0. These deaths include 2 from small-pox, one of which occurred in Dundee and the other in Paisley, 43 from measles, 32 of which occurred in Glasgow, 17 from scarlet fever, 73 from whooping-cough, 26 from diphtheria, 6 from enteric fever, all of which occurred in Glasgow, and 110 from diarrhoea, of which 91 were of children of less than 2 years old. Three deaths from cerebro-spinal meningitis were registered during the month, two of which occurred in Glasgow and the other in Greenock.

Deaths from puerperal septic conditions numbered 9; from influenza 1; from malignant disease 177, of which 100 were ascribed to carcinoma, 6 to sarcoma, and 71 to other or unspecified form of cancer; from heart disease 197; from apoplexy and hemiplegia 121; from premature birth debility 64; and from alcoholism 2.

Deaths from pneumonia numbered 138, and constituted 6·6 per cent. of the total. They are 12 fewer than in the previous month, and 23 fewer than in July of last year. Deaths from bronchitis numbered 61, and constituted 2·9 per cent. of the total. They are 11 fewer than in the previous month, and 20 fewer than in July of last year.

The death-rate from all respiratory diseases, phthisis excluded, was 1·5 per thousand, and is 0·2 less than the corresponding rate for June. The death-rate from these causes ranged from 1·9 in Glasgow and in Greenock to 0·6 in Dundee. In Edinburgh it was 1·5, in Aberdeen 1·3, in Paisley 1·1, in Perth 1·0, and in Leith 0·9.

Deaths ascribed to tuberculosis numbered 257, and constituted 12·2 per cent. of the total. They are 50 fewer than in June, and 27 fewer than in July of last year. Of these deaths 150, or 7·1 per cent. of the total deaths, were ascribed to phthisis. The death-rate from tuberculosis amounted to 1·8 per thousand, while that from phthisis amounted to 1·0 per thousand. The former rate ranged from 2·1 in Glasgow and 1·9 in Leith to 1·1 in Paisley and 1·2 in Aberdeen. The latter rate ranged from 1·3 in Glasgow to 0·7 in Edinburgh, in Aberdeen, and in Perth. The death-rate from tuberculosis is 0·4 less than in June, while that from phthisis is also 0·4 less.

Deaths attributed to violent causes numbered 112. Of them 6 were suicidal, 2 being by hanging, 2 by cutting, 1 by precipitation, and 1 on a railway.

Among the deaths registered there were 4 of males and 7 of females aged 90 years and upwards, the oldest being a female annuitant aged 98 years.

#### BIRTHS, DEATHS, ETC., IN OTHER SELECTED REGISTRATION DISTRICTS.

On page 110 is given the usual monthly statement regarding the births, deaths, and marriages in forty-nine selected registration districts. These districts have an estimated aggregate population of 821,272. Births registered in them during the month numbered 1818, deaths 899, and marriages 686. The equivalent annual birth-rate is 26·1, the death-rate 12·9, and the marriage-rate 9·8. Compared with the corresponding rates for July of last year, the birth-rate is 1·2 higher, the death-rate 0·2 higher, and the marriage-rate 0·1 higher.

Among the deaths registered in these districts during the month there were 6 from measles, 7 from scarlet fever, 16 from whooping-cough, 13 from diphtheria, 4 from enteric fever, 39 from diarrhoea, 2 from laryngitis, 75 from pneumonia, bronchitis, and pleurisy, 117 from tuberculous disease, and 1 from cerebro-spinal meningitis, which was registered in Partick.

# THE METEOROLOGICAL RETURNS

FOR

## EIGHT OF THE PRINCIPAL TOWNS IN SCOTLAND,

Reduced and corrected as heretofore for instrumental errors, give for their mean position, *i.e.*, Lat.  $56^{\circ}12'$  N., and Long.  $3^{\circ}30'$  W., and height 156 feet above the sea-level,

### For the month of JULY 1911.

Mean barometric pressure,  $30\cdot086$  inches; greater than the average of 1856–1905 by  $0\cdot194$  inch.

Mean temperature,  $60^{\circ}\cdot6$ ; greater by  $2^{\circ}\cdot5$ .

Mean daily range of temperature,  $17^{\circ}\cdot1$ ; greater by  $2^{\circ}\cdot9$ .

Rain, number of days, 16; being the average.

Rain, depth in inches,  $1\cdot87$ ; less by  $1\cdot13$  inch.

Wind, direction of: a 2 days' excess of winds from S.W.

Hence the month of July 1911 was characterised by a very high mean pressure; a high mean temperature, with a very large mean daily range; a low mean rainfall; and a slight excess of winds from S.W.

The mean pressure of  $30\cdot086$  inches was  $0\cdot194$  inch above the normal, and during the last fifty years a higher mean pressure has been recorded for July only in 1885. At Leith the sea-level extremes were  $30\cdot618$  inches on 10th and  $29\cdot526$  inches on 18th, and pressure there was above 30 inches from 3rd to 15th, and on several days later in the month, and above  $30\cdot5$  inches from 9th to 13th.

The mean temperature was  $60^{\circ}\cdot6$ , or  $2^{\circ}\cdot5$  above the normal, the excess being largely due to unusually high day temperatures, for the days were  $3^{\circ}\cdot9$  above the average, but the nights only  $1^{\circ}\cdot0$  above. As compared with recent years, July 1905 had about the same mean temperature, whilst July 1901 was much warmer. Moderate temperatures early in the month, with lowest readings very generally on 3rd, were followed by remarkably warm weather during the second week, conditions about the normal during the third week, and thereafter a moderate temperature excess. For two or three days about 12th very high readings occurred, and the shade maximum of  $90^{\circ}$  at Perth on 12th has been equalled in Scotland only thrice in July since observations were organised more than fifty years ago,—in 1908, 1901, and 1876. The lowest reading was  $36^{\circ}$  on 3rd, also at Perth.

The mean rainfall was  $1\cdot86$  inches, or 38 per cent. below the normal, being the lowest mean since 1904. The Eastern towns had serious deficiencies, ranging from 45 per cent. to 60 per cent.; Glasgow a moderate and Paisley a trifling shortage, and Greenock its normal amount. Unimportant falls occurred early in the month, with rainless weather during the second week, and thereafter rather heavy falls in the West, but only trifling amounts in the East. Amounts exceeding half-an-inch occurred at Greenock on 20th, 24th, and 27th, and at Glasgow and Paisley on 27th, whilst at Edinburgh and Dundee no day had as much as one quarter of an inch.

Thunder occurred at Aberdeen on 1st, at Paisley and Greenock on 21st, and at Aberdeen and Perth on 30th.

The sunshine aggregates for the month were much above the normal, largely due to brilliant weather during the second week.

ABSTRACT OF METEOROLOGICAL OBSERVATIONS

Made at GLASGOW, EDINBURGH, DUNDEE, ABERDEEN, PAISLEY, LEITH, GREENOCK, and PERTH,

During the Month of JULY 1911.

**REPORT.**

NOTE.—The estimates of population now used are founded upon the numbers returned in the Summaries prepared by the Registrars after the recent Census, and will be employed until the revised details of the Census are obtained. All rates for previous months which are quoted in this Report have been re-calculated on revised estimates.

DURING the month of August 1911 there were registered in eight of the principal towns of Scotland, viz., Glasgow, Edinburgh, Dundee, Aberdeen, Paisley, Leith, Greenock and Perth, the births of 3611 living children, of whom 1833 were males, and 1778 females. These births are 38 fewer than in July, and 151 fewer than in August of last year. The equivalent annual birth-rate is 24·9 per thousand, a rate which is 0·2 less than in July, and 1·1 less than in August of last year. It is the lowest birth-rate recorded for the month of August in any of these reports, the previous lowest being that for August of last year, which was 26·0. The birth-rate for the month ranged from 31·1 in Greenock to 18·1 in Perth. In Glasgow it was 26·9, in Leith 25·4, in Dundee 24·3, in Paisley 23·3, in Aberdeen 22·4, and in Edinburgh 21·1.

Of the 3611 children whose births were registered during the month, 250, or 6·9 per cent., were illegitimate. These illegitimate births are 56 fewer than in July, and 49 fewer than in August of last year. The illegitimate rate for the month is 1·5 below that for July, and 1·0 below that for August of last year.

Marriages registered during the month numbered 1031. They are 892 fewer than in July, but 56 more than in August of last year. The equivalent annual marriage-rate is 7·1 per thousand, a rate which is 6·1 below that for July, but 0·3 above that for August of last year.

Deaths registered in the eight towns during the month numbered 2190. They are 90 more than in July, and 21 more than in August of last year. The equivalent annual death-rate is 15·1 per thousand, a rate which is 0·6 above that for July, and 0·1 above that for August of last year. The death-rate for the month ranged from 18·9 in Greenock to 12·3 in Aberdeen. In Glasgow it was 16·5, in Leith 15·6, in Dundee 15·1, in Paisley 13·5, in Perth 12·8, and in Edinburgh 12·7. In Edinburgh and in Perth the death-rate was lower than in July, but in all the other towns it was higher.

Of the 2190 deaths, 812, or 37·1 per cent., were of children of less than five years old, while 422, or 19·3 per cent., were of persons of over sixty-five. The former are 167 more than in July, and 92 more than in August of last year. The latter are 43 fewer than in July.

Deaths of children of less than one year old numbered 595. They are 187 more

than in July, and 106 more than in August of last year. The infantile mortality rate is 157 per thousand of the average number of births registered monthly in these towns during the preceding twelve months, a rate which is 50 more than in July, and 31 more than in August of last year. The rate for the month ranged from 246 in Perth to 105 in Edinburgh. In Greenock it was 193, in Glasgow 172, in Dundee 165, in Paisley 149, in Leith 141, and in Aberdeen 124.

Deaths from the principal epidemic diseases, namely, small-pox, measles, scarlet fever, whooping-cough, diphtheria, enteric fever and diarrhoea, numbered 463. They are 186 more than in July, and 233 more than in August of last year. The death-rate from these causes was 3·2 per thousand, and ranged from 4·3 in Perth to 1·4 in Edinburgh. In Glasgow and in Greenock it was 4·1, in Paisley 3·8, in Dundee and in Leith 2·9, and in Aberdeen 1·6. These deaths include 2 from small-pox, both of which were registered in Dundee, 32 from measles, 7 from scarlet fever, 41 from whooping-cough, 18 from diphtheria, 8 from enteric fever, and 355 from diarrhoea, of which 290 were of children of less than two years old. Deaths from diarrhoea are 245 more than in July, and 136 more than in August of last year, and they number more than in the month of August for any year since 1901. The death-rate from diarrhoea amounted to 2·4 per thousand, and ranged from 3·8 in Greenock and 3·3 in Glasgow and in Perth, to 0·8 in Aberdeen and 1·0 in Edinburgh. Seven deaths from cerebro-spinal meningitis were registered during the month, all of them occurring in Glasgow.

Deaths from puerperal septic conditions numbered 2; from influenza 1; from malignant disease 212, of which 129 were ascribed to carcinoma, 10 to sarcoma, and 73 to other or unspecified form of cancer; from heart disease 160; from apoplexy and hemiplegia 100; from premature birth 83; and from alcoholism 5.

Deaths from pneumonia numbered 82, and constituted 3·7 per cent. of the total deaths. They are 56 fewer than in July, and 40 fewer than in August of last year. Deaths from bronchitis numbered 49, and constituted 2·2 per cent. of the total. They are 12 fewer than in July, and 38 fewer than in August of last year.

The death-rate from all respiratory diseases, phthisis excluded, was 1·1 per thousand, and is 0·4 per thousand less than in July. The death-rate from these causes ranged from 1·6 per thousand in Leith to 0·3 per thousand in Perth. In Glasgow it was 1·3, in Edinburgh 1·2, in Greenock 1·1, in Paisley 1·0, and in Dundee and in Aberdeen 0·6.

Deaths ascribed to tuberculosis numbered 265, and constituted 12·1 per cent. of the total. They are 8 more than in July, and the same number more than in August of last year. Of these deaths 148, or 6·8 per cent. of the total deaths, were ascribed to phthisis, being 2 fewer than in July, and the same number fewer than in August of last year. The death-rate from tuberculosis amounted to 1·8 per thousand, while that from phthisis amounted to 1·0 per thousand. The former rate ranged from 2·8 in Greenock and 2·3 in Perth, to 1·2 in Leith and 1·4 in Paisley. The latter rate ranged from 1·9 in Greenock to 0·8 in Paisley. The death-rates from tuberculosis and from phthisis are each the same as in July.

Deaths attributed to violent causes numbered 96. Of them 9 were suicidal, 4 being by hanging, 2 by gas poisoning, and 1 each by poison, by cutting, and by precipitation.

Among the deaths registered there were 2 of males and 5 of females aged 90 years and upwards, the oldest being a widow aged 96.

#### BIRTHS, DEATHS, ETC., IN OTHER SELECTED REGISTRATION DISTRICTS.

On page 126 is given the usual monthly statement regarding the births, deaths, and marriages in forty-nine selected registration districts. These districts have an estimated aggregate population of 821,272. Births registered in them during the month numbered 1632, deaths 926, and marriages 319. The equivalent annual birth-rate is 23·4, the death-rate 13·3, and the marriage-rate 4·6. Compared with the corresponding rates for August of last year, the birth-rate is 1·1 lower, the death-rate 0·6 higher, and the marriage-rate 0·1 higher.

Among the deaths registered in these districts during the month there were 9 from measles, 2 from scarlet fever, 11 from whooping-cough, 10 from diphtheria, 4 from enteric fever, 129 from diarrhoea, 53 from pneumonia, bronchitis, and pleurisy, and 98 from tuberculosis. No deaths were registered from cerebro-spinal meningitis.

### DEATHS FROM ALL CAUSES at Four Periods of Life.

Registered during the Month of AUGUST 1911.

[illegible]

MONTHLY ABSTRACT OF BIRTHS, MARRIAGES, AND DEATHS, in *selected* Registration Districts; with the Numbers of Deaths in each from the Principal Epidemic Diseases, from Pneumonia and other Inflammatory Diseases of the Respiratory Organs, and from Tuberculous Diseases, &c.—AUGUST 1911.

REGISTRATION DISTRICTS.	Population.		Total Births.	Total Marriages.	Total Deaths.	Small-pox.	Measles.	Scarlet Fever.	Whooping-Cough.	Diphtheria.	Enteric Fever.	All Diarrhoeal Diseases.	Croup and Laryngitis.	Pneumonia, Bronchitis, and Pleurisy.	All Tuberculous Diseases.

# THE METEOROLOGICAL RETURNS

FOR

## EIGHT OF THE PRINCIPAL TOWNS IN SCOTLAND,

Reduced and corrected as heretofore for instrumental errors, give for their mean position, *i.e.*, Lat.  $56^{\circ}12'$  N., and Long.  $3^{\circ}30'$  W., and height 156 feet above the sea-level,

For the month of AUGUST 1911.

Mean barometric pressure, 29·936 inches; greater than the average of 1856–1905 by +0·078 inch.

Mean temperature,  $60^{\circ}7$ ; greater by  $3^{\circ}4$ .

Mean daily range of temperature,  $15^{\circ}1$ ; greater by  $1^{\circ}0$ .

Rain, number of days, 16; less by 1 day.

Rain, depth in inches, 2·19; less by 1·29 inch.

Wind, direction of: a 4 days' excess of winds from S. and S.W.

Hence the month of August 1911 was characterised by a high mean pressure; an extremely high mean temperature, with a rather large mean daily range; a low mean rainfall; and an excess of winds from S. and S.W.

The mean pressure was 29·936 inches, or 0·078 inch above the normal. At Leith the sea-level extremes were 30·337 inches on 14th and 29·577 inches on 5th, and pressure there was above 30 inches on 2nd, 8th, from 10th to 17th, and on 30th.

The mean temperature was  $60^{\circ}7$ , or  $3^{\circ}4$  above the normal, the days being  $3^{\circ}9$  and the nights  $2^{\circ}9$  above their respective averages. During the last fifty years a warmer August has been experienced only in 1893 and 1899, the mean for the month in each of these years being  $61^{\circ}0$ . During the first half of the month temperature was extremely high, the mean for the first week at Leith being as much as  $6^{\circ}$  above the normal. Later, conditions fluctuated somewhat, though readings remained high in the West until near the end of the month, when there was a moderate drop in temperature. Highest readings occurred about 9th, 13th or 17th, and lowest on 16th and 17th, when light winds from N. and N.E. prevailed, or on 30th. The actual extremes were  $83^{\circ}$  at Dundee and at Leith on 9th, and  $41^{\circ}$  at Perth on 17th.

The mean rainfall was 2·19 inches, or 34 per cent. below the normal. Greenock had a trifling excess, but the other towns a decided deficiency, all the Eastern towns having less than half their average amounts. Considered generally, the month was much the driest August since 1899, but in that month the general mean was only 0·98 inch and there was a serious shortage in all districts. Moderate falls on 3rd or 4th at Aberdeen, on 9th during a thunderstorm, and here and there on 19th, were almost the only interruptions in a dry spell which lasted until 23rd. Thereafter conditions became unsettled, with, however, only slight falls in the East, but some considerable amounts in the West, and on 31st as much as 2·43 inches at Greenock and 1·33 inches at Paisley.

Thunder was heard, or actual thunderstorms occurred, on several days; and a South-westerly gale on 31st.

Sunshine aggregates for the month were decidedly above the normal.

ABSTRACT OF METEOROLOGICAL OBSERVATIONS

Made at GLASGOW, EDINBURGH, DUNDEE, ABERDEEN, PAISLEY, LEITH, GREENOCK, and PERTH,

**REPORT.**

NOTE.—The estimates of population now used are founded upon the numbers returned in the Summaries prepared by the Registrars after the recent Census, and will be employed until the revised details of the Census are obtained. All rates for previous months which are quoted in this Report have been re-calculated on revised estimates.

DURING the month of September 1911 there were registered in the towns of Glasgow, Edinburgh, Dundee, Aberdeen, Paisley, Leith, Greenock and Perth, the births of 3335 living children, of whom 1678 were male, and 1657 female. These births are 276 fewer than in August, and 110 fewer than in September of last year. The equivalent annual birth-rate is 23·7 per thousand of the estimated aggregate population of the eight towns, which rate is 1·2 below that of August, 0·9 below that of September of last year, and is the lowest September birth-rate of the eight towns yet recorded, the previous lowest being that of 1910, which was 24·6. The birth-rate of the month ranged from 25·6 in Glasgow and 25·2 in Greenock to 20·3 in Edinburgh. In Aberdeen it was 24·0, in Leith 23·1, in Perth 22·7, in Paisley 22·2, and in Dundee 22·1.

Of the 3335 living children whose births were registered during the month, 255, or 7·6 per cent., were illegitimate. These illegitimate births are 5 more than in August, and 5 more than in September of last year. The illegitimate rate is 0·7 above that of August, 0·3 above that of September of last year, and varied from 10·1 in Edinburgh and 8·3 in Dundee to 3·2 in Greenock and 3·3 in Leith.

Marriages registered during the month numbered 1213; they are 182 more than in August, and 118 more than in September of last year. The equivalent annual marriage-rate is 8·6 per thousand, which is 1·5 above that of August, 0·8 above that of September of last year, and is the highest September marriage-rate since 1902, with the exception of that for 1907, which was the same.

Deaths registered in the eight towns during the month numbered 2233, 1153 being of males, and 1080 of females. They are 43 more than were registered in August, and 147 more than in September of last year. The equivalent annual death-rate is 15·9 per thousand, which is 0·8 above that of August, 1·0 above that of September, and is the highest September death-rate since 1906. The death-rate of the month ranged from 18·4 in Dundee and 17·6 in Perth to 11·2 in Paisley and 13·4 in Leith. In Glasgow it was 16·7, in Greenock 16·7, in Aberdeen 15·4, and in Edinburgh 14·5.

Of the 2233 deaths, 821, or 36·8 per cent., were of children of less than five years old, and 471, or 21·1 per cent., were of persons of over sixty-five. The former

are 9 more than in August, and 86 more than in September of last year. The latter are 49 more than in August.

Deaths of children of less than one year old numbered 596; they are 1 more than in August, and 99 more than in September of last year. The infantile mortality rate is 162 per thousand of the average number of births registered monthly in these eight towns during the preceding twelve months, a rate which is 5 above that of August, and 29 above that of September of last year. It is higher than the corresponding September rates of all recent years. The infantile mortality rate of the month ranged from 281 in Perth and 249 in Dundee, to 80 in Paisley and 130 in Edinburgh. In Glasgow it was 165, in Leith 152, in Greenock 149, and in Aberdeen 143.

Deaths from the principal epidemic diseases, namely, small-pox, measles, scarlet fever, whooping-cough, diphtheria, enteric fever, and diarrhoea, numbered 409; they are 54 fewer than in August, but 193 more than in September of last year. The aggregate death-rate from these causes was 2·9 per thousand, and varied from 4·3 in Dundee and 4·1 in Perth to 1·4 in Paisley and 1·6 in Edinburgh. In Glasgow it was 3·4, in Greenock 3·1, in Aberdeen 2·7, and in Leith 1·8. These deaths include 13 from measles, 12 from scarlet fever, 40 from whooping-cough, 37 from diphtheria, 8 from enteric fever, and 299 from diarrhoea, of which 265 were of children of less than two years old. The deaths from diarrhoea are 56 fewer than in August, but are more than in all Septembers since 1906.

Deaths from cerebro-spinal meningitis numbered 5, 3 being registered in Glasgow, and 1 each in Edinburgh and Dundee. Deaths from puerperal septic conditions numbered 4; from influenza 3; from malignant disease 171, of which 92 were ascribed to carcinoma, 8 to sarcoma, and 71 to other or unspecified form of cancer; from heart disease 188; from apoplexies 108; from premature birth debility 69; and from alcoholism 3.

Deaths from pneumonia numbered 142, and constituted 6·4 per cent. of the total; they are 60 more than in August, and 10 more than in September of last year. Deaths from bronchitis numbered 73, and constituted 3·3 per cent. of the total; they are 24 more than in August, but 21 fewer than in September of last year.

Deaths from tuberculous diseases numbered 258, and constituted 11·6 per cent. of the total deaths of the month; they are 7 fewer than in August, but 6 more than in September of last year. The death-rate from tuberculosis amounted to 1·8 per thousand, and ranged from 2·1 in Leith to 1·5 in Dundee. In Aberdeen and Perth this rate was 2·0, in Glasgow 1·9, in Edinburgh and Greenock 1·8, and in Paisley 1·6. Of the deaths from tuberculosis 156 were ascribed to phthisis, a number which is 8 more than in August, but 6 less than in September of last year, and is equivalent to an annual death-rate of 1·1 per thousand.

Deaths from violent causes numbered 86. Of them 6 were stated to be suicidal.

Among those whose deaths were registered in the eight towns during the month there were 2 males and 5 females aged ninety years and upwards, the oldest being a man who formerly was an attendant on the insane.

---

#### BIRTHS, DEATHS, ETC., IN OTHER SELECTED REGISTRATION DISTRICTS.

On page 142 is given the usual monthly statement regarding the births, deaths, and marriages registered in forty-nine selected registration districts. These districts have an estimated aggregate population of 821,272. Births registered in them during the month numbered 1579, deaths 962, and marriages 415. The equivalent annual birth-rate is 23·4, the death-rate 14·3, and the marriage-rate 6·2. Compared with the corresponding rates of the previous year, the birth-rate is 0·3 less, the death-rate 1·6 more, and the marriage-rate 0·2 more.

Among the deaths registered in these districts during the month, 5 were ascribed to measles, 6 to scarlet fever, 14 to whooping-cough, 11 to diphtheria, 7 to enteric fever, 125 to diarrhoea, 2 to croup, 80 to pneumonia, bronchitis, and pleurisy, and 128 to tuberculous disease.

# THE METEOROLOGICAL RETURNS

FOR

## EIGHT OF THE PRINCIPAL TOWNS IN SCOTLAND,

Reduced and corrected as heretofore for instrumental errors, give for their mean position, *i.e.*, Lat.  $56^{\circ}12'$  N., and Long.  $3^{\circ}30'$  W., and height 156 feet above the sea-level,

### For the month of SEPTEMBER 1911.

Mean barometric pressure,  $29.978$  inches; greater than the average of 1856–1905 by  $0.102$  inch.

Mean temperature,  $54^{\circ}1$ ; greater by  $0^{\circ}5$ .

Mean daily range of temperature,  $15^{\circ}4$ ; greater by  $2^{\circ}1$ .

Rain, number of days, 12; less by 4 days.

Rain, depth in inches,  $1.43$ ; less by  $1.74$  inch.

Wind, direction of: a 4 days' excess of winds from S.W. and W., and a 2 days' excess of winds from N.W. and N.

Hence the month of September 1911 was characterised by a high mean pressure; a slightly high mean temperature, with a large mean daily range; a low mean rainfall; and an excess of winds from a westerly and also from a northerly quarter.

The mean pressure was  $29.978$  inches, or  $0.102$  inch above the normal. At Leith the sea-level extremes were  $30.384$  inches on 15th and  $29.244$  inches on 20th, and pressure there was above 30 inches from 2nd to 7th, on 9th and 10th, from 14th to 18th and on 29th.

The mean temperature was  $54^{\circ}1$ , or  $0^{\circ}5$  above the normal, the days being  $1^{\circ}5$  above and the nights  $0^{\circ}6$  below their respective averages. At Aberdeen and in the Edinburgh area there was a well-defined excess, but at the other chief towns a close approximation to the normal and at Greenock and Perth a trifling deficiency. During the first half of the month temperature was in general decidedly above the normal, but thereafter conditions were irregular, and with winds from some northerly point low night readings occurred on 21st and 22nd and extremely cold days at the end of the month. Thus at Edinburgh on 30th the thermometer failed to reach  $50^{\circ}$ . The extreme readings were  $76^{\circ}$  at Aberdeen on 6th and 7th—elsewhere the maximum occurred on 10th or 11th—and  $28^{\circ}$  at Perth on 22nd.

The mean rainfall was  $1.43$  inches, or 55 per cent. below the normal. All the towns had a decided deficiency, ranging from 42 per cent. at Leith to 64 per cent. at Dundee. During the first three weeks there were many rainless days, though moderately heavy falls occurred towards the N.E. on 8th, and at Paisley and Greenock no fall of as much as one-tenth of an inch occurred until 19th. Towards the end of the month conditions became somewhat more unsettled, with falls exceeding half an inch in the Edinburgh area and in the west on 29th. At Edinburgh and Leith half the month's small total was accounted for on that day.

During the last week of the month the weather was at times stormy, with falls of snow on the hills in many districts.

ABSTRACT OF METEOROLOGICAL OBSERVATIONS

Made at GLASGOW, EDINBURGH, DUNDEE, ABERDEEN, PAISLEY, LEITH, GREENOCK, and PERTH,

REPORT.

NOTE.—The estimates of population now used are founded upon the numbers returned in the Summaries prepared by the Registrars after the recent Census, and will be employed until the revised details of the Census are obtained. All rates for previous months which are quoted in this Report have been re-calculated on revised estimates.

DURING the month of October 1911 there were registered in the towns of Glasgow, Edinburgh, Dundee, Aberdeen, Paisley, Leith, Greenock and Perth the births of 3577 living children, of whom 1823 were male, and 1754 female. These births are 242 more than were registered in September of this year, but 48 fewer than in October of last year. The equivalent annual birth-rate is 24·6 per thousand of the estimated aggregate population of the eight towns, a rate which is 0·9 above that of September, but 0·4 below that of October of last year. It is the lowest October aggregate birth-rate yet recorded for these eight towns, that of October of last year being the previous lowest recorded. The birth-rate of the month ranged from 27·2 in Leith, and 27·0 in Paisley, to 16·1 in Perth. In Glasgow it was 26·4, in Greenock 25·3, in Dundee 25·0, in Aberdeen 22·1, and in Edinburgh 21·1.

Of the 3577 children registered during the month, 293, or 8·2 per cent., were illegitimate. These illegitimate births are 38 more than in September, and 16 more than in October of last year. The illegitimate rate is 0·6 above that of September, and the same amount above that of October of last year, and varied from 12·2 in Perth to 4·8 in Leith. In Aberdeen it was 10·8, in Edinburgh 10·1, in Greenock 9·3, in Dundee 8·9, in Glasgow 7·5, and in Paisley 5·2.

Marriages registered during the month numbered 1118; they are 99 fewer than in September, but 63 more than in the corresponding month of last year. The equivalent annual marriage-rate is 7·7 per thousand, which is 1·0 less than in September, but 0·4 more than in October of last year.

Deaths registered in the eight towns during the month numbered 2348, 1225 being of males, and 1123 of females. They are 115 more than in September, and 253 more than in October of last year. The equivalent annual death-rate is 16·2, which is 0·3 above that of September, and 1·7 above that of October of last year. It is higher than the aggregate October death-rate of these eight towns in each year subsequent to 1906. The death-rate of the month ranged from 17·7 in Glasgow to 12·8 in Perth. In Dundee it was 16·5, in Leith 15·5, in Edinburgh 14·8, in Aberdeen 14·7, in Paisley 14·1, and in Greenock 13·6.

Of the 2348 deaths, 740, or 31·5 per cent., were of children of less than five years old, and 492, or 21·0 per cent., were of persons of over sixty-five. The former are 81 fewer than in September, but 49 more than in October of last year. The latter are 21 more than in September.

Deaths of children of less than one year old numbered 499; they are 97 fewer than in September, but 53 more than in October of last year. The infantile mortality rate is 132 per thousand of the average number of births registered monthly in the eight towns during the preceding twelve months, a rate which is 30 below that of September, but 17 above that of October of last year. The infantile mortality rate of the month varied from 162 in Leith to 67 in Greenock. In Dundee it was 153, in Glasgow 142, in Aberdeen 140, in Edinburgh 114, in Paisley 82, and in Perth 78.

Deaths from the principal epidemic diseases, namely, small-pox, measles, scarlet fever, whooping-cough, diphtheria, enteric fever, and diarrhoea, numbered 261. They are 148 fewer than in September, but 15 more than in October of last year. The combined death-rate from these causes was 1·8 per thousand; it is 1·1 less than in September, and ranged from 2·6 in Perth, and 2·5 in Aberdeen, to 0·6 in Edinburgh. In Dundee it was 2·3, in Glasgow 2·1, in Paisley 1·7, in Leith and in Greenock 1·3. These deaths include 36 from measles, 32 from scarlet fever, 21 from whooping-cough, 41 from diphtheria, 5 from enteric fever, and 126 from diarrhoea, of which 109 were of children of less than two years old. Compared with the returns of September, deaths from diarrhoea are 173 fewer, from whooping-cough 19 fewer, and from enteric fever 3 fewer, but those from diphtheria are 4 more, from scarlet fever 20 more, and from measles 23 more.

One death from cerebro-spinal meningitis was registered during the month. Deaths from influenza numbered 3; from puerperal septic conditions 10; from malignant disease 192, of which 114 were ascribed to carcinoma, 9 to sarcoma, and 69 to other or unspecified form of cancer; from heart disease 185; from apoplexy 139; from premature birth debility 78; and from alcoholism 4.

Deaths from pneumonia numbered 228, and constituted 9·7 per cent. of the total deaths of the month; they are 86 more than in September, and 19 more than in October of last year. Deaths from bronchitis numbered 158, and constituted 6·7 per cent. of the total deaths of the month; they are 85 more than in September, and 35 more than in October of last year.

Deaths from tuberculous disease numbered 245, and constituted 10·4 per cent. of the total deaths of the month; they are 13 fewer than in September, but 10 more than in October of last year. The death-rate from tuberculosis amounted to 1·7 per thousand, and ranged from 2·2 in Greenock to 0·9 in Aberdeen. In Glasgow this rate was 1·9, in Edinburgh 1·8, in Dundee 1·7, in Paisley 1·5, in Leith 1·2, and in Perth 1·0. Of the deaths from tuberculosis 145 were ascribed to phthisis, a number which is 11 less than in September, and 6 less than in October of last year, and is equivalent to an annual death-rate from that cause of 1·0 per thousand.

Deaths from violent causes numbered 120; of them 3 were ascribed to suicide.

Among those dying during the year there were 2 males and 6 females aged ninety years and upwards, the oldest being two females aged 98.

---

#### BIRTHS, DEATHS, ETC., IN OTHER SELECTED REGISTRATION DISTRICTS.

On page 158 there is given the usual monthly statement regarding the births, deaths, and marriages registered in forty-nine selected registration districts during the month. These districts have an estimated aggregate population of 821,272. Births registered in them during the month numbered 1675, deaths 983, and marriages 367. The equivalent annual birth-rate is 24·0, the death-rate 14·1, and the marriage-rate 5·3. Compared with the corresponding rates of the previous year, the birth-rate is 0·2 lower, the death-rate 0·4 higher, and the marriage-rate 0·4 higher.

Among the deaths registered in these districts during the month, there were 18 from measles, 8 from scarlet fever, 11 from whooping-cough, 21 from diphtheria, 6 from enteric fever, 53 from diarrhoea, 2 from laryngitis, 177 from pneumonia, bronchitis, and pleurisy, and 115 from tuberculosis.

# THE METEOROLOGICAL RETURNS

FOR

## EIGHT OF THE PRINCIPAL TOWNS IN SCOTLAND,

Reduced and corrected as heretofore for instrumental errors, give for their mean position, *i.e.*, Lat.  $56^{\circ}12'$  N., and Long.  $3^{\circ}30'$  W., and height 156 feet above the sea-level,

### For the month of OCTOBER 1911.

Mean barometric pressure, 29·922 inches; greater than the average of 1856–1905 by 0·102 inch.

Mean temperature,  $46^{\circ}0$ ; less by  $0^{\circ}9$ .

Mean daily range of temperature,  $12^{\circ}4$ ; greater by  $0^{\circ}8$ .

Rain, number of days, 14; less by 3 days.

Rain, depth in inches, 3·04; less by 0·41 inch.

Wind, direction of: a 7 days' excess of winds from N., NE. and E.

Hence the month was characterised by a high mean pressure; a rather low mean temperature, with a somewhat large mean daily range; a slightly low mean rainfall; and a large excess of winds from a north-easterly quarter.

The mean pressure was 29·922 inches, or 0·102 inch above the normal. Pressure was high and steady until 19th, but thereafter fluctuations were considerable, with a very rapid fall of the barometer on 29th. At Leith the sea-level extremes were 30·583 inches on 10th and 29·042 inches on 22nd, and pressure there was above 30 inches from 1st to 19th.

The mean temperature was  $46^{\circ}0$ , or  $0^{\circ}9$  below the normal, the days being  $0^{\circ}5$  and the nights  $1^{\circ}3$  below their respective averages. In the Edinburgh area temperature was all but the normal, whilst at Perth the deficiency amounted to  $1^{\circ}7$ . With frequent winds from between north and east rather cold weather was experienced as a rule, but during the third week there was a decided temperature excess. Towards the end of the month some rapid fluctuations took place, and on 29th the range of temperature was very large, the actual extremes for the month at Greenock occurring on that day. Highest readings were recorded on 11th, 21st, or during the last two or three days of the month, and lowest readings on 28th or 29th. The actual extremes were  $60^{\circ}$  at Aberdeen on 11th and at Glasgow on 21st, and  $19^{\circ}$  at Perth on 29th.

The mean rainfall was 3·04 inches, or 12 per cent. below the normal, but relatively to the normal the distribution was irregular. At Aberdeen there was a trifling, and in the Edinburgh area a well-marked excess, whilst at Dundee there was a shortage of 48 per cent., and at Perth of 38 per cent. From 1st to 18th practically no rain fell at Perth and Dundee, and but little elsewhere; but thereafter conditions were unsettled. On 19th, Leith, Glasgow, and Paisley had more than half-an-inch; on 23rd, Aberdeen, more than 1 inch; on 24th, Dundee, Perth, and Edinburgh about half-an-inch; whilst on 29th very heavy falls occurred in the west, as much as  $2\frac{1}{2}$  inches at Greenock, with more than half-an-inch at Edinburgh and Leith on the following day.

Wintry weather was experienced on several days towards the close of the month, with snow towards the north and on the Borders. On 29th a violent south-westerly gale occurred, and the heavy rains which accompanied it caused flooding in many districts. On 30th a thunderstorm in the west, with lightning or slight thunder elsewhere.

Dense fog occurred at times, especially around 13th and 20th.

ABSTRACT OF METEOROLOGICAL OBSERVATIONS

REPORT.

NOTE.—The estimates of population now used are founded upon the numbers returned in the Summaries prepared by the Registrars after the recent Census, and will be employed until the revised details of the Census are obtained. All rates for previous months which are quoted in this Report have been re-calculated on revised estimates.

DURING the month of November 1911 there were registered in the towns of Glasgow, Edinburgh, Dundee, Aberdeen, Paisley, Leith, Greenock and Perth the births of 3356 living children, of whom 1693 were male, and 1663 female. These births are 221 fewer than were registered in the eight towns in October of this year, and 128 fewer than in November of last year. The equivalent annual birth-rate is 23·9 per thousand of the estimated aggregate population of the towns, which is 0·7 less than that of October, and 1·0 less than that of the corresponding month of last year. It is the lowest aggregate November birth-rate yet recorded in these monthly reports, the previous lowest being that of 1908, which was 24·6. The birth-rate of the month varied from 28·1 in Greenock, and 26·2 in Glasgow, to 18·5 in Edinburgh, and 19·3 in Perth. In Dundee it was 25·0, in Aberdeen 23·0, in Paisley 22·6, and in Leith 22·2.

Of the 3356 children whose births were registered during the month, 253, or 7·5 per cent., were illegitimate. These births are 40 fewer than in October, and 16 fewer than in November of last year. The illegitimate rate is 0·7 less than in October, 0·2 less than in November of last year, and ranged from 10·5 in Perth, and 9·4 in Aberdeen, to 3·4 in Leith, and 5·7 in Greenock. In Edinburgh it was 8·0, in Dundee 7·7, in Glasgow 7·5, and in Paisley 7·0.

Marriages registered during the month numbered 909; they are 209 fewer than in October, but 32 more than in November of last year. The equivalent annual marriage-rate is 6·5 per thousand, and is 1·2 less than that of October, but 0·2 more than that of November of last year.

Deaths registered in the eight towns during the month numbered 2390, of them 1203 being of males, and 1187 of females. The equivalent annual death-rate is 17·0 per thousand, which is 0·8 above that of October, and 0·2 below that of November of last year. The death-rate of the month varied from 19·5 in Aberdeen, and 17·9 in Glasgow, to 12·7 in Paisley, and 14·2 in Perth. In Edinburgh it was 16·9, in Greenock 16·2, in Dundee 15·0, and in Leith 14·8.

Of the deaths registered during the month, 864, or 36·2 per cent., were of children of less than five years old, and 487, or 20·4 per cent., of persons of over sixty-five.

The former are 124 more than in the previous month, and 165 more than in the corresponding month of last year. The latter are 5 fewer than in the previous month.

Deaths of children of less than one year old numbered 554; they are 55 more than in the previous month, and 124 more than in the corresponding month of last year. The infantile mortality rate is 152 per thousand of the average number of births registered monthly in the eight towns during the preceding twelve months, a rate which is 20 above that of the previous month, 37 above that of the corresponding month of last year, and which varied from 185 in Aberdeen, and 169 in Glasgow, to 85 in Leith, and 97 in Perth. In Edinburgh it was 156, in Dundee 117, in Paisley 108, and in Greenock 106.

Deaths from the principal epidemic diseases, namely small-pox, measles, scarlet fever, whooping-cough, diphtheria, enteric fever, and diarrhoea, numbered 263. They are 2 more than in October, and equal to an annual death-rate from these causes of 1·9 per thousand. This rate varied from 5·7 in Aberdeen, where there was an epidemic of measles, and 2·4 in Perth, to 0·4 in Paisley, and 0·9 in Edinburgh. In Glasgow it was 1·8, in Greenock 1·5, in Leith 1·4, and in Dundee 1·3. These deaths include 100 from measles, of which 58 were registered in Aberdeen; 18 from scarlet fever; 25 from whooping-cough; 46 from diphtheria; 6 from enteric fever; and 68 from diarrhoea, of which 55 were of children of less than two years old. Compared with the returns of the previous month deaths from measles are 64 more, from diphtheria 5 more, from whooping-cough 4 more, and from enteric fever 1 more, but those from diarrhoea are 58 fewer, and from scarlet fever 14 fewer.

One death from typhus fever was registered during the month, and 4 from cerebro-spinal meningitis. Deaths from influenza numbered 7; from puerperal septic conditions 3; and from malignant disease 158, of which 96 were ascribed to carcinoma, 5 to sarcoma, and 57 to other or unspecified form of cancer. Deaths from heart disease numbered 202; from apoplexy 124; from premature birth debility 73; and from alcoholism 3.

Deaths from pneumonia numbered 279, and constituted 11·7 per cent. of the total deaths of the month; they are 51 more than in the previous month and 36 more than in the corresponding month of last year. Deaths from bronchitis numbered 224, and constituted 9·4 per cent. of the total; they are 66 more than in the previous month, but 8 fewer than in the corresponding month of last year.

Deaths from tuberculous disease numbered 260, and constituted 10·9 per cent. of the total; they are 15 more than in the previous month, and 3 more than in the corresponding month of last year. The death-rate from this cause is 1·9 per thousand, and varied from 2·3 in Dundee, and 2·1 in Aberdeen, to 1·4 in Paisley, and 1·5 in Greenock. Of the deaths from tuberculosis, 174 were ascribed to phthisis, the death-rate from that cause being 1·2 per thousand, and varying from 1·7 in Dundee, and 1·4 in Leith and Perth, to 0·5 in Greenock, and 0·7 in Paisley. The deaths from phthisis are 29 more than in the previous month, and 3 more than in the corresponding month of last year.

Deaths from violent causes numbered 129, and of them 7 were ascribed to suicide.

Among those whose deaths were registered during the month, 2 males and 8 females were aged ninety years and upwards, the oldest being a widow aged 97.

---

#### BIRTHS, DEATHS, ETC., IN OTHER SELECTED REGISTRATION DISTRICTS.

On page 174 is given the usual monthly statement regarding the births, marriages, and deaths registered in forty-nine selected registration districts. These districts have an estimated aggregate population of 821,272. Births registered in them during the month numbered 1593, marriages 278, and deaths 991. The equivalent annual birth-rate is 23·6 per thousand, the marriage-rate 4·1, and the death-rate 14·7. Compared with the rates for the corresponding month of last year, the birth-rate is 0·6 lower, the marriage-rate is the same, and the death-rate is 2·2 lower.

Among the deaths registered in these districts during the month, there were 17 from measles, 6 of which occurred in Plantation and 9 in Govan, 13 from scarlet fever, 16 from whooping-cough, 23 from diphtheria, 4 from enteric fever, 1 from typhus fever, which was registered in Riccarton, 22 from diarrhoea, 4 from laryngitis, 153 from bronchitis, pneumonia, and pleurisy, 104 from tuberculosis, and 1 from cerebro-spinal meningitis, which was registered in Rothesay.

# THE METEOROLOGICAL RETURNS

FOR

## EIGHT OF THE PRINCIPAL TOWNS IN SCOTLAND,

Reduced and corrected as heretofore for instrumental errors, give for their mean position, *i.e.*, Lat.  $56^{\circ}12'$  N., and Long.  $3^{\circ}30'$  W., and height 156 feet above the sea-level,

### For the month of NOVEMBER 1911.

Mean barometric pressure, 29·594 inches ; less than the average of 1856–1905 by 0·247 inch.

Mean temperature,  $41^{\circ}5$  ; less by  $0^{\circ}1$ .

Mean daily range of temperature,  $9^{\circ}6$  ; less by  $0^{\circ}3$ .

Rain, number of days, 21 ; greater by 5 days.

Rain, depth in inches, 4·84 ; greater by 1·44 inch.

Wind, direction of : a 4 days' excess of winds from between N. and E., and a 3 days' excess from S. and S.W.

Hence the month was characterised by an extremely low mean pressure ; a mean temperature practically equal to the normal, with a fractionally low mean daily range ; a high mean rainfall ; and an excess of winds from a north-easterly quarter, and also from S. and S.W.

The mean pressure was 29·594 inches, or 0·247 inch below the normal. In November 1910 the mean was 29·581 inches, and these are the lowest pressures experienced in November since 1882. At Leith pressure at sea-level reached 30 inches only from 23rd to 26th and on 29th and 30th, and fell below 29 inches on 5th, 18th, and 19th : the extremes there were 30·290 inches on 29th and 28·630 inches on 5th.

The mean temperature was  $41^{\circ}5$ , or  $0^{\circ}1$  below the normal, both days and nights practically agreeing with their averages. Temperature fluctuations were in general not of a striking character. During the first ten days or so the weather was on the whole cold ; during the week ending 18th temperature was above the normal, except in northern districts ; later, easterly winds were accompanied by rather low day readings ; whilst conditions were again mild at the close of the month. The extremes were  $57^{\circ}$  at Leith on 14th and  $25^{\circ}$  at Perth on 10th.

The mean rainfall of 4·84 inches, or 42 per cent. above the normal, was the highest mean for November since 1900. The differences for the individual towns ranged from an excess of more than 80 per cent. at Leith and Edinburgh to an excess of 10 per cent. at Dundee. With stormy weather of a westerly to south-westerly type heavy falls were experienced during the first week, Greenock having more than 1 inch on 1st, 3rd and 5th. From 13th to 17th conditions were again unsettled, with heavy falls at Aberdeen on 15th and 16th and in the Edinburgh area on 17th. Thereafter until 27th practically no rain fell in the west, whilst elsewhere easterly winds brought irregular falls. On 27th rain was general, and on 30th moderate amounts fell in the west.

From 3rd to 5th very stormy weather was experienced, and on 5th considerable damage was done by the high winds and heavy rainfalls. Later, conditions were at times very unsettled, with snowstorms in the north.

ABSTRACT OF METEOROLOGICAL OBSERVATIONS

Made at GLASGOW, EDINBURGH, DUNDEE, ABERDEEN, PAISLEY, LEITH, GREENOCK, and PERTH,

During the Month of NOVEMBER 1911.

**REPORT.**

NOTE.—The estimates of population now used are founded upon the numbers returned in the Summaries prepared by the Registrars after the recent Census, and will be employed until the revised details of the Census are obtained. All rates for previous months which are quoted in this Report have been re-calculated on revised estimates.

DURING the month of December 1911 there were registered in eight of the principal towns of Scotland, namely, Glasgow, Edinburgh, Dundee, Aberdeen, Paisley, Leith, Greenock, and Perth, the births of 3389 living children, of whom 1714 were male, and 1675 female. These births are 33 more than in November, but 278 fewer than in December 1910. The equivalent annual birth-rate is 23·3 per thousand of the estimated aggregate population of these towns, being 0·6 less than in November, and 2·0 less than in December 1910. It is the lowest aggregate monthly birth-rate for these towns recorded in these reports, the previous lowest being 23·7 in September 1911. The birth-rate for the month ranged from 25·9 in Paisley to 17·7 in Perth. In Greenock it was 25·7, in Glasgow 25·0, in Aberdeen 24·9, in Dundee 22·3, in Edinburgh and in Leith 19·4.

Of the 3389 children whose births were registered, 270, or 8·0 per cent., were illegitimate. These births are 17 more than in November, but 17 fewer than in December 1910. The illegitimate rate is 0·5 more than in November, and 0·2 more than in December 1910, and ranged from 11·3 in Aberdeen to 2·3 in Leith. In Edinburgh it was 10·2, in Dundee 7·7, in Glasgow 7·5, in Perth 7·4, in Greenock 7·3, and in Paisley 4·8.

Marriages registered during the month numbered 1424; they are 515 more than in November, and 103 more than in December 1910. The equivalent annual marriage-rate is 9·8 per thousand, being 3·3 above that for November, and 0·8 above that for December 1910. It is also higher than the December marriage-rates for 1908 and 1909.

Deaths registered during the month numbered 2484, of them 1215 being of males, and 1269 of females. The equivalent annual death-rate is 17·1, being 0·1 above that for November, but 0·1 below that for December 1910. It is the lowest December death-rate recorded in these reports. The death-rate for the month ranged from 20·7 in Greenock to 11·5 in Perth. In Aberdeen it was 20·3, in Glasgow 17·7, in Dundee 17·3, in Paisley 15·5, in Edinburgh 15·1, and in Leith 13·7.

Of the deaths registered during the month, 832, or 33·5 per cent., were of children of less than five years old, and 562, or 22·6 per cent., were of persons of over sixty.

five. The former are 32 fewer than in November, but 88 more than in December 1910. The latter are 75 more than in November.

Deaths of children of less than one year old numbered 498; they are 56 fewer than in November, but 14 more than in December 1910. The infantile mortality rate is 133 per thousand of the average number of births registered monthly in these towns during the preceding twelve months, a rate which is 19 below that for November, but 8 above that for December 1910. This rate ranged from 240 in Aberdeen to 32 in Perth. In Dundee it was 149, in Greenock 144, in Glasgow 131, in Edinburgh 100, in Paisley 98, and in Leith 74.

Deaths from the principal epidemic diseases, namely, small-pox, measles, scarlet fever, whooping-cough, diphtheria, enteric fever, and diarrhoea, numbered 285. They are 22 more than in November, and are equal to an annual death-rate from these causes of 2·0 per thousand. This rate ranged from 5·5 in Aberdeen, where it was principally due to the prevalence of measles and of whooping-cough, to 0·7 in Edinburgh. In Glasgow it was 2·1, in Greenock 1·9, in Paisley 1·5, in Perth 1·3, in Leith 1·0, and in Dundee 0·9. These deaths include 133 from measles, of which 73 were registered in Glasgow, and 46 in Aberdeen; 15 from scarlet fever; 41 from whooping-cough, of which 18 were registered in Aberdeen, and 17 in Glasgow; 41 from diphtheria; 10 from enteric fever, all of which were registered in Glasgow; and 45 from diarrhoea, of which 32 were of children of less than two years old. Compared with the returns for November, deaths from diarrhoea are 23 fewer, from diphtheria 5 fewer, and from scarlet fever 3 fewer, but those from enteric fever are 4 more, from whooping-cough 16 more, and from measles 33 more.

No deaths were registered during the month from typhus fever, but 3 were registered from cerebro-spinal meningitis. Deaths from influenza numbered 6; from puerperal septic infection 7; from malignant disease 175, of which 105 were ascribed to carcinoma, 7 to sarcoma, and 63 to other or unspecified form of cancer; from heart disease 217; from apoplexy 133; from premature birth 80; and from alcoholism 5.

Deaths from pneumonia numbered 301, and constituted 12·1 per cent. of the total deaths of the month; they are 22 more than in November, but 5 fewer than in December 1910. Deaths from bronchitis numbered 209, and constituted 8·4 per cent. of the total deaths; they are 15 fewer than in November, and 45 fewer than in December 1910. The death-rate from all respiratory diseases, phthisis excluded, was 3·8 per thousand, and ranged from 5·9 in Greenock, to 1·3 in Perth; in Aberdeen it was 4·9, in Dundee 4·1, in Paisley 3·9, in Glasgow 3·8, in Leith 3·7, and in Edinburgh 2·8.

Deaths from tuberculosis numbered 247, and constituted 9·9 per cent. of the total deaths; they are 13 fewer than in November, and 28 fewer than in December 1910. The death-rate from tuberculosis is 1·7 per thousand, and ranged from 2·5 in Greenock, to 0·7 in Perth. Of the deaths from tuberculosis, 171 were ascribed to phthisis, the death-rate from that cause being 1·2 per thousand, and ranging from 1·9 in Dundee, to 0·3 in Perth. The deaths from phthisis are 3 fewer than in November, and 17 fewer than in December 1910.

Deaths from violent causes numbered 101; of them 8 were suicidal.

Among those whose deaths were registered during the month, 2 males and 10 females were aged ninety years and upwards, the oldest being a widow aged 97.

#### BIRTHS, DEATHS, ETC., IN OTHER SELECTED REGISTRATION DISTRICTS.

On page 190 is given the usual monthly statement regarding the births, marriages, and deaths registered in forty-nine selected registration districts. These districts have an estimated aggregate population of 821,272. Births registered in them during the month numbered 1598, marriages 654, and deaths 1134. The equivalent annual birth-rate is 22·9 per thousand, the marriage-rate 9·4, and the death-rate 16·3. Compared with the rates for December 1910, the birth-rate is 0·6 lower, the marriage-rate 0·9 higher, and the death-rate 0·5 higher.

Among the deaths registered in these districts during the month, there were 22 from measles, 12 from scarlet fever, 29 from whooping-cough, 26 from diphtheria, 4 from enteric fever, 24 from diarrhoea, 3 from laryngitis, 1 from croup, 214 from pneumonia, bronchitis, and pleurisy, 104 from tuberculosis, and 1 from cerebro-spinal meningitis, which was registered in Falkirk.

TABLE I.—ABSTRACT OF BIRTHS, DEATHS, AND MARRIAGES,  
DECEMBER 1911.

# THE METEOROLOGICAL RETURNS

FOR

## EIGHT OF THE PRINCIPAL TOWNS IN SCOTLAND,

Reduced and corrected as heretofore for instrumental errors, give for their mean position, *i.e.*, Lat.  $56^{\circ}12'$  N., and Long.  $3^{\circ}30'$  W., and height 156 feet above the sea-level,

### For the month of DECEMBER 1911.

Mean barometric pressure,  $29\cdot504$  inches ; less than the average of 1856–1905 by  $0\cdot295$  inch.

Mean temperature,  $41^{\circ}5$  ; greater by  $2^{\circ}8$ .

Mean daily range of temperature,  $8^{\circ}5$  ; less by  $0^{\circ}6$ .

Rain, number of days, 26 ; greater by 9 days.

Rain, depth in inches,  $5\cdot14$  ; greater by  $1\cdot44$  inch.

Wind, direction of : an 8 days' excess of winds from between S.E. and S.W.

Hence the month was characterised by an extremely low mean pressure ; a high mean temperature, with a slightly low mean daily range ; a high mean rainfall ; and a large excess of winds from a south-westerly quarter.

The mean pressure was  $29\cdot504$  inches, or  $0\cdot295$  inch below the normal. In December 1901 the mean was  $29\cdot488$  inches, and these are the lowest pressures experienced in December since 1876. At Leith pressure at sea-level fell below 29 inches on 11th and reached 30 inches only on 31st, the extremes there being  $30\cdot176$  inches and  $28\cdot667$  inches.

The mean temperature was  $41^{\circ}5$ , or  $2^{\circ}8$  above the normal, the days being  $2^{\circ}5$  and the nights  $3^{\circ}1$  above their respective averages. Early in the month temperature was on the whole below the normal, but from about 10th onwards, with winds as a rule from some southerly point, almost continuously above. The third week was unusually mild, with a mean temperature of from  $4^{\circ}$  to  $6^{\circ}$  above the normal. At all the chief towns the maximum occurred on 18th, the actual highest being  $55^{\circ}$  at Leith and Perth, and the minimum on various dates between 4th and 9th. The actual lowest was  $26^{\circ}$  at Perth on 4th, 5th, and 8th.

The mean rainfall was  $5\cdot14$  inches, or 39 per cent. above the normal. In the Edinburgh area there was a close agreement with the average, but elsewhere there was a decided excess,—as much as 77 per cent. at Aberdeen, 60 per cent. at Dundee, and about 50 per cent. at Greenock and Paisley. Falls exceeding 1 inch occurred at Greenock on 6th and 8th, and rain fell there and at Paisley on every day of the month. In the Edinburgh area no heavy falls occurred, and there were many days with quite nominal amounts, whilst amounts exceeding  $0\cdot5$  inch were recorded at Aberdeen on 10th, 15th, and 29th ; at Dundee on 10th and 15th ; and at Perth on 15th.

A touch of wintry weather was experienced about 9th, with some slight falls of snow ; and on 17th a thunderstorm occurred in the west. The prevailing south-westerly winds reached gale force at times.

ABSTRACT OF METEOROLOGICAL OBSERVATIONS

Made at GLASGOW, EDINBURGH, DUNDEE, ABERDEEN, PAISLEY, LEITH, GREENOCK, and PERTH,
